[link] Medic and Healer Council [Website | Amazon Wishlist]

It's important that donations are made to a variety of these campaigns because while all are in the general area of the campsite and do communicate, the different campaigns don't always or can't always share different resources. Grab a group of friends, make strips of paper, and shuffle to make donations.

phebeaux

It has come to my attention that this regained popularity in recent weeks. As the author, I'm deeply humbled by the support in the form of reblogs and likes even despite the crass language. I'm not Lakota or from the areas of these tribes. I'm from a Pueblo in New Mexico (shout-out to the Pueblo camp at standing Rock!) And Navajo Nation. I made this post at s tumultuous time in my life when I had accrued so much capital and privilege in the white man's world. Back when these were working links, I was a community organizer that went into a post traumatic stress disorder episode while this post was getting popular 2 years ago when Standing Rock was still at camp. I ask folks to reblog this out of respect to the many people and messages passed that allows for campaigns like these to exist. I'll never know how much was raised but know that y'all were a part of something huge and important. That two years is not a long time and progress is like watching grass grow.

The fact that homeowners associations exist is wild to me. You buy an entire house and some lady a couple doors down can tell you that you're not allowed to display your antique frog statuette and you have to pay a fine? insane.

just-call-me-vendetta Follow

The HOA near my house allowed Trump flags and upside down American flags.

uncleromeo Follow

hey so fun fact… home owners associations became a thing when people of color started moving into nice neighborhoods.

white people wanted to make sure their new Jewish, Black, and Brown neighbors couldn't put up "non-christian" symbols that made their homes identifiable to the point of "lowering property values".

they would impose rules like lawn maintenance and aesthetic upkeep while threatening anyone who offered services like painting, roofing, gutters, trash, or shoveling snow to their non-white neighbors.

its literally just another thing that exists because of racism.

ori-ebon Follow

I wonder just how much bullshit in American society exists purely for the purpose of gatekeeping white privilege….

"Anger is the demand of accountability, It is evaluation, judgment, and refutation. It is reflective, visionary, and participatory. It's a speech act, a social statement, an intention, and a purpose. It's a risk and a threat. A confirmation and a wish. It is both powerlessness and power, palliative and a provocation. In anger, you will find both ferocity and comfort, vulnerability and hurt. Anger is the expression of hope.

How much anger is too much? Certainly not the anger that, for many of us, is a remembering of a self we learned to hide and quiet. It is wilful and disobedient. It is survival, liberation, creativity, urgency, and vibrancy. It is a statement of need. An insistence of acknowledgment. Anger is a boundary. Anger is boundless. An opportunity for contemplation and self-awareness. It is commitment. Empathy. Self-love. Social responsibility. If it is poison, it is also the antidote. The anger we have as women is an act of radical imagination. Angry women burn brighter than the sun."

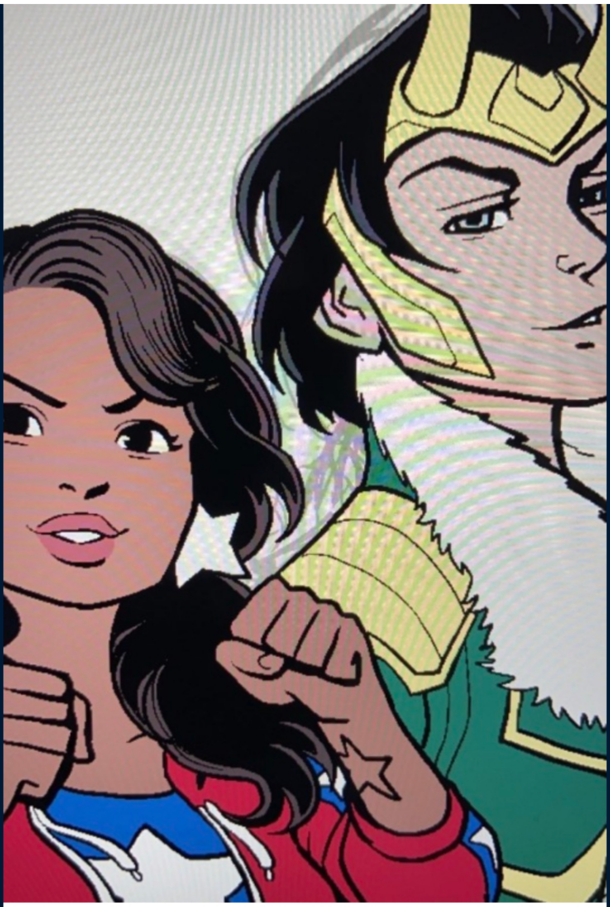
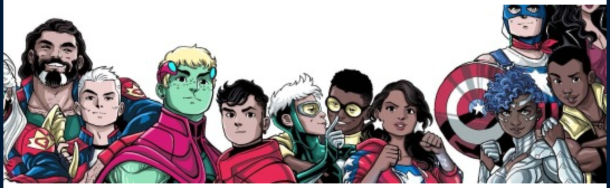
I was wondering why Loki wasn’t featured in any of the Marvel’s Voices: Pride cover art, as he is more or less queer in the comics and mythology. But it turns out, he freaking **was** featured, but Marvel cut him out!



This seems to be the earlier version of the cover and this is what became the official artwork:



They actually cut him out which doesn't bode well at all for the Loki series and Marvel's future representation of queer characters at large. If they will do it with Loki, they will do it with the Young Avengers too. Both Loki and Billy and Teddy (and Tommy) are incredibly important to me and this behavior worries me greatly.

'Loki' takes over: Tom Hiddleston on his new TV series

and a decade in the MCU

Ten years after Hiddleston first chose chaos in Thor, Marvel's fan favorite God of Mischief is going even bigger with his time-bending Disney+ show.

Tom Hiddleston is Loki, and he is burdened with glorious purpose: After playing Thor's puckish brother for over a decade in the Marvel Cinematic Universe, no one understands the mercurial Asgardian God of Mischief as well as the actor. He can teach an entire seminar on Loki if given the opportunity — which he actually did during pre-production on his forthcoming Disney+ show. In conversation, Hiddleston quotes lines from his MCU debut, 2011's *Thor*, almost verbatim, and will playfully correct you if you mistakenly refer to Asgard's Rainbow Bridge as the Bifrost, which is the portal that connects Loki and Thor's homeworld to the Nine Realms, including Midgard, a.k.a. Earth. "Well, the Bifrost technically is the energy that runs through the bridge," he says with a smile. "But nine points to Gryffindor!" And when he shows up to the photo shoot for this very digital cover, he hops on a call with our photo editor to pitch ways the concept could be even more Loki, like incorporating the flourish the trickster does whenever magically conjuring something. The lasting impression is that playing Loki isn't just a paycheck.

"Rather than ownership, it's a sense of responsibility I feel to give my best every time and do the best I can because I feel so grateful to be a part of what Marvel Studios has created," the 40-year-old Brit tells EW over Zoom a few days after the shoot and a week out from Thor's 10th anniversary. "I just want to make sure I've honored that responsibility with the best that I can give and the most care and thought and energy."

After appearing in three Thor movies and three Avengers, Hiddleston is bringing that passion to his first solo Marvel project, *Loki*, the House of Ideas' third Disney+ series following the sitcom pastiche *WandaVision* and the topical *The Falcon and the Winter Soldier.* Led by head writer Michael Waldron (*Doctor Strange in the Multiverse of Madness, Heels)*, the six-episode drama sees Hiddleston's shapeshifting agent of chaos step out from behind his brother's shadow and into the spotlight for a timey-wimey, sci-fi adventure that aims to get to the bottom of who Loki really is. "I wanted to explore slightly more complex character questions," says Waldron. "It's not just good versus bad. Is anybody all good? Is anybody all bad? What makes a hero, a hero? A villain, a villain?"

Even though Loki — who loves sowing mayhem with his illusion magic and shapeshifting, all with a major chip on his shoulder — has never been one for introspection, the idea of building an entire show around him was a no-brainer for Marvel. When asked why Loki was one of the studio's first Disney+ shows, Marvel president Kevin Feige replies matter-of-factly, "More Hiddleston, more Loki." First introduced as Thor's (Chris Hemsworth) envious brother in Kenneth Branagh's *Thor*, Loki went full Big Bad in 2012's *The Avengers*. That film cemented the impish rogue as one of the shared universe's fan favorites, thanks to Hiddleston's ability to make him deliciously villainous yet charismatic and, most importantly, empathetic. The character's popularity is one of the reasons he's managed to avoid death many times.

"He's been around for thousands of years. He had all sorts of adventures," says Feige. "Wanting to fill in the blanks and see much more of Loki's story [was] the initial desire [for the series]."

The Loki we meet on the show is not the one who fought the Avengers in 2012 and evolved into an antihero in *Thor: The Dark World* and *Thor: Ragnarok* before meeting his demise at the hands of the mad titan Thanos (Josh Brolin) in 2018's *Avengers: Infinity War*. Instead, we'll be following a Loki from a branched timeline (a variant, if you will) after he stole the Tesseract following his thwarted New York invasion and escaped S.H.I.E.L.D. custody during the time heist featured in *Avengers: Endgame*. In other words, this Loki hasn't gone through any sort of redemption arc. He's still the charming yet petulant god who firmly believes he's destined to rule and has never gotten his due.

Premiering June 9, *Loki* begins with the Time Variance Authority — a bureaucratic organization tasked with safeguarding the proper flow of time — arresting the Loki Variant seen in *Endgame* because they of time — arresting the Loki variant seen in *Endgame* because they want his help fixing all of the timeline problems he caused while on the run with the Tesseract. So there will be time travel, and a lot more of it than in *Endgame*. As Loki makes his way through his own procedural, he'll match wits with new characters including Owen Wilson's Agent Mobius, a brilliant TVA analyst, and Gugu Mbatha-Raw's Judge Renslayer. The question in early episodes is whether Loki will help them or take over.

“One of the things Kevin Feige led on was, 'I think we should find a way of exploring the parts of Loki that are independent of his relationship with Thor,' or see him in a duality or in relationship with others, which I thought was very exciting,” says Hiddleston, who also serves as an executive producer on the show. “So the Odinson saga, that trilogy of films, still has its integrity, and we don't have to reopen it and retell it.”

Yet, in order to understand where Loki is going, it's important to see where he came from.

Hiddleston can't believe how long he and Loki have been connected. “I've been playing this character for 11 years,” he says. “Which is the first time I have said that sentence, I realize, and it [blows] my mind. I don't know what percentage that is exactly of my 40 years of being alive, but it's substantial.”

His time as Loki actually goes a bit further back, to 2009 — a year after Robert Downey Jr. big banged the MCU into existence with *Iron Man* — when he auditioned for Thor. It's no secret that Hiddleston initially went in for the role of the titular God of Thunder, but Feige and director Kenneth Branagh thought his natural charm and flexibility as an actor made him better suited for the movie's damaged antagonist. “Tom gave you an impression that he could be ready for anything, performance-wise,” says Branagh, who had previously worked with him on a West End revival of Checkov's *Ivanov* and the BBC series *Wallander*. “Tom has a wild imagination, so does Loki. He's got a mischievous sense of humor and he was ready to play. It felt like he had a star personality, but he was a team player.”

Hiddleston fully immersed himself in the character. Outside of studying Loki's history in the Marvel Comics, he also researched how Loki and the Trickster God archetype appeared across mythology and different cultures. “He understood that he was already in something special [and] it was a special character in a special part of that early moment in the life of the Marvel universe where [he] also needed to step up in other ways,” says Branagh, who was impressed by the emotional depth Hiddleston brought to the part, especially when it came to how isolated Loki felt in the Asgardian royal family.

There was a lot riding on that first *Thor* feature. For one, no one knew if audiences would immediately latch onto a Shakespearean superhero movie partially set on an alien planet populated by the Norse Gods of legend. Second, it was integral to Feige's plans for the shared universe. Loki was supposed to be the main villain in *The Avengers*, which would not only mirror how Earth's mightiest heroes joined forces in 1963's *Avengers #1* but also give Thor a believable reason for teaming up with Iron Man, Captain America (Chris Evans), and the rest of the capes. Feige first clued Hiddleston into those larger plans when the actor was in L.A. before Thor started shooting.

“I was like, 'Excuse me?' Because he was already three, four steps ahead," says Hiddleston. "That took me a few minutes to process, because I didn't quite realize how it just suddenly had a scope. And being cast as Loki, I realized, was a very significant moment for me in my life, and was going to remain. The creative journey was going to be so exciting."

Hiddleston relished the opportunity to go full villain in *Avengers*, like in the scene where Loki ordered a crowd to kneel before him outside a German opera house: "It's the unspoken truth of humanity, that you crave subjugation," says the Machiavellian god. "The bright lure of freedom diminishes your life's joy in a mad scramble for power, for identity. You were made to be ruled. In the end, you will always kneel."

"I just knew that in the structure of that film, I had to lean into his role as a pure antagonist," Hiddleston recalls. "What I always found curious and complex about the way Loki is written in Avengers, is that his status as an antagonist comes from the same well of not belonging and being marginalized and isolated in the first Thor film. Loki now knows he has no place in Asgard."

Loki did find a place within the audience's hearts, though. Feige was "all in" on Hiddleston as his Loki from the beginning, but even he couldn't predict how much fans would love him. Feige recalls the reaction at the 2013 San Diego Comic-Con: "Did we know that after he was the villain in two movies, he would be bringing thousands of people to their feet in Hall H, in costume, chanting his name? No, that was above and beyond the plan that we were hoping for and dreaming of." It was a dream Feige first got an inkling of a year earlier during the *Avengers* press tour when a Russian fan slipped past security, snuck into Mark Ruffalo's car, and asked the Hulk actor to give Hiddleston a piece of fan art she created. "That was one of the early signs there was much more happening with this quote-unquote villain."

Despite that popularity, the plan was to kill Loki off in 2013's *Thor: The Dark World,* but the studio reversed course after test audiences refused to believe he actually died fighting the Dark Elves. Alas, he couldn't out-illusion death forever. After returning in Taika Waititi's colorful and idiosyncratic *Thor: Ragnarok*, Hiddleston's character perished for real in the opening moments of *Infinity War*. In typical Loki fashion, before Thanos crushed his windpipe, he delivered a defiant speech that indicated he'd finally made peace with the anger he felt toward his family.

"It felt very, very final, and I thought, 'Okay, that's it. This is Loki's final bow and a conclusive end to the Odinson saga,'" says Hiddleston, who shot that well-earned death scene in 2017.

But, though he didn't know it yet, the actor's MCU story was far from over.

EXCLUSIVE
Entertainment
EXCLUSIVE

Credit: Charlie Gray for EW

When Hiddleston returned to film two scenes in *Avengers: Endgame* in 2017, he had no idea where Loki portaled off to after snatching the Tesseract. "Where'd he go? When does he go? How does he get there? These are all questions I remember asking on the day, and then not being given any answers," Hiddleston recalls. To be fair, it's likely the Powers That Be didn't necessarily have answers then. While Feige can't exactly recall when the writers' room for Endgame first devised Loki's escape sequence, he does know that setting up a future show wasn't the primary goal — because a Loki series wasn't on the horizon just yet.

"[That scene] was really more of a wrinkle so that one of the missions that the Avengers went on in *Endgame* could get screwed up and not go well, which is what required Cap and Tony to go further back in time to the '70s," says Feige. Soon after that, though, former Disney CEO Bob Iger approached Feige about producing content for the studio's forthcoming streaming service. "I think the notion that we had left this hanging loose end with Loki gave us the in for what a *Loki* series could be. So by the time [*Endgame*] came out, we did know where it was going."

As for Hiddleston, he didn't find out about the plans for a Loki show until spring 2018, a few weeks before *Infinity War* hit theaters. "I probably should not have been surprised, but I was," says the actor. "But only because *Infinity War* had felt so final."

Nevertheless, Hiddleston was excited about returning for his show. He was eager to explore Loki's powers, especially the shapeshifting, and what it meant that this disruptive figure still managed to find a seat beside the gods in mythology. "I love this idea [of] Loki's chaotic energy somehow being something we need. Even though, for all sorts of reasons, you don't know whether you can trust him. You don't know whether he's going to betray you. You don't why he's doing what he's doing," says Hiddleston. "If he's shapeshifting so often, does he even know who he is? And is he even interested in understanding who he is? Underneath all those masks, underneath the charm and the wit, which is kind of a defense anyway, does Loki have an authentic self? Is he introspective enough or brave enough to find out? I think all of those ideas are all in the series — ideas about identity, ideas about self-knowledge, self-acceptance, and the difficulty of it."

> *"The series will explore Loki's powers in a way they have not yet been explored, which is very, very exciting."*

The thing that truly sold Hiddleston on the show was Marvel's decision to include the Time Variance Authority, a move he describes as "the best idea that anybody had pertaining to the series." Feige and Loki executive producer Stephen Broussard had hoped to find a place for the TVA — an organization that debuted in 1986's *Thor #372* and has appeared in *She-Hulk* and *Fantastic Four* stories — in the MCU for years, but the right opportunity never presented itself until Loki came along. "Putting Loki into his own procedural series became the eureka moment for the show," says Feige.

The TVA's perspective on time and reality also tied into the themes that Waldron, Loki's head writer, was hoping to explore. "Loki is a character that's always reckoning with his own identity, and the TVA, by virtue of what they do, is uniquely suited to hold up a mirror to Loki and make him really confront who he is and who he was supposed to be," says Waldron. Hiddleston adds: "[That] was very exciting because in the other films, there was always something about Loki that was very controlled. He seemed to know exactly what the cards in his hand were and how he was going to play them.... And Loki versus the TVA is Loki out of control immediately, and in an environment in which he's completely behind the pace, out of his comfort zone, destabilized, and acting out."

To truly dig into who Loki is, the creative team had to learn from the man who knows him best: Hiddleston. "I got him to do a thing called Loki School when we first started," says director Kate Herron. "I asked him to basically talk through his 10 years of the MCU — from costumes to stunts, to emotionally how he felt in each movie. It was fantastic."

Hiddleston got something out of the Loki school, too. Owen Wilson both attended the class and interviewed Hiddleston afterward so that he could better understand Loki, as his character Mobius is supposed to be an expert on him. During their conversation, Wilson pointedly asked Hiddleston what he loved about playing the character.

"And I said, 'I think it's because he has so much range,'" says Hiddleston. "I remember saying this to him: 'On the 88 keys on the piano, he can play the twinkly light keys at the top. He can keep it witty and light, and he's the God of Mischief, but he can also go down to the other side and play the heavy keys. And he can play some really profound chords down there, which are about grief and betrayal and loss and heartbreak and jealousy and pride.'" Hiddleston recalls Wilson being moved by the description: "He said, 'I think I might say that in the show.' And it was such a brilliant insight for me into how open Owen is as an artist and a performer.'"

Owen Wilson as Mobius and Tom Hiddleston as Loki in 'Loki.'| Credit: Chuck Zlotnick/Marvel Studios

Everyone involved is particularly excited for audiences to see Hiddleston and Wilson's on-screen chemistry. "Mobius is not unlike Owen Wilson in that he's sort of nonplussed by the MCU," says Feige. "[Loki] is used to getting a reaction out of people, whether it's his brother or his father, or the other Avengers. He likes to be very flamboyant and theatrical. Mobius doesn't give him the reaction he's looking for. That leads to a very unique relationship that Loki's not used to."

As for the rest of the series, we know that Loki will be jumping around time and reality, but the creative team isn't keen on revealing when and where. "Every episode, we tried to take inspiration from different things," says Waldron, citing *Blade Runner's* noir aesthetic as one example.

"Part of the fun of the multiverse and playing with time is seeing other versions of characters, and other versions of the titular character in particular," says Feige, who also declined to confirm if Loki ties into *Doctor Strange in the Multiverse of Madness* and/or other upcoming projects.

Making *Loki* was especially meaningful to Hiddleston because they shot most of it during the pandemic, in late 2020. "It will remain one of the absolute most intense, most rewarding experiences of my life," he says. "It's a series about time, and the value of time, and what time is worth, and I suppose what the experience of being alive is worth. And I don't quite know yet, and maybe I don't have perspective on it, if all the thinking and the reflecting that we did during the lockdown ended up in the series. But in some way, it must have because everything we make is a snapshot of where we were in our lives at that time."

While it remains to be seen what the future holds for Loki beyond this initial season, Hiddleston isn't preparing to put the character to bed yet. "I'm open to everything," he says. "I have said goodbye to the character. I've said hello to the character. I said goodbye to the character [again]. I've learned not to make assumptions, I suppose.

I'm just grateful that I'm still here, and there are still new roads to explore."

Tom Hiddleston breaks down a decade of Loki's most memorable scenes

Ahead of the 'Loki' premiere, EW asked Tom Hiddleston to take us through his character's greatest hits.

EW.COM

Tom Hiddleston made his glorious debut as Loki in 2011's Thor, which celebrated its 10th anniversary exactly two weeks ago today. Since then, the 40-year-old actor's God of Mischief has gone on a remarkable journey in the Marvel Cinematic Universe, as he grappled with the living in his heroic brother Thor's (Chris Hemsworth) shadow and evolved from villain to antihero. Now, it's time for Loki to step into the spotlight on Disney+'s Loki. Ahead of the six-episode drama's premiere, though, EW asked Hiddleston to take us through Loki's greatest hits.

The audition (2009)

It's well-known that Hiddleston actually auditioned for Thor's titular role. "I remember thinking I should probably do some exercise because Thor is a very athletic character. So I did that, got into his kind of regime and did my camera test, and put on the blonde wig, and swung the hammer," he says. "But I do remember on the piece of paper I signed, it said, 'The role of Thor/Loki.' I thought, 'Okay...' Long-story short: Chris Hemsworth is definitive in the role of Thor. I certainly think so, and the right decision was made on that day. I'm very glad it went the way it went."

Thor (2011)

Directed by Kenneth Branagh, The first Thor contains the scene that truly set the stage for Hiddleston and Loki's post-Avengers breakout. After discovering he's actually descended from the Frost Giants, Loki confronts his (adopted) father, Odin (Anthony Hopkins), about the deception in a harrowing and transformative scene. "That's the creation, in a way, of Loki's status as a villain, is this intense feeling of marginalization and isolation, [and] that he does not belong, that Thor is not his brother," says Hiddleston. "I'll never forget doing that scene because I had such respect, and still do, for Sir Anthony Hopkins, and suddenly I was having to play tennis with him in a very emotional place."

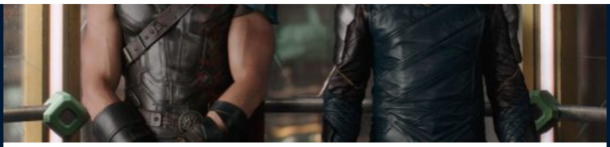
Marvel Studios President Kevin Feige adds: "There's just so much pain and angst in it. I think that is the moment that Tom really got his hooks into the audience."

The Avengers (2012)

Loki has many memorable moments in The Avengers, but Hulk interrupting the "puny" god's egomaniacal speech and pounding him to the ground is the funniest. "I had a piece of wire tied to my ankle and there was a mat on the floor, which was out of shot, and three of the strongest stunt guys holding the wire at the end behind the camera. The experience being yanked out of frame was one I will not forget in a hurry," says Hiddleston, explaining he was the only one in front of the camera when they shot it because Mark Ruffalo didn't perform the role via motion-capture in that first Avengers film. "For about two years after that, I couldn't go through airports anywhere in the world without somebody kind of going, 'Hey, Mr. Loki, I love it when you get Hulk smashed.' It became a bit of a thing in a fun way,"

Thor: The Dark World (2013)

Loki loves to use his powers to guard himself both physically and emotionally, as seen in Thor: The Dark World when Thor visits his imprisoned brother after the Dark Elves murdered their mother. At first, Loki is smug as always and everything seems in order, but Thor calls him out and the illusion dissipates, revealing that Loki is broken and grieving. "There's this love of their mother that unites these two brothers, adopted or not, and they form a kind of unpredictable and unstable alliance," says Hiddleston. "That scene was really key to anchoring that film in something honest and emotional."



Thor: Ragnarok (2017)

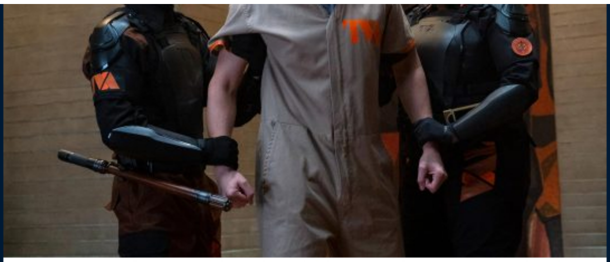
Loki learns nothing hurts like apathy when his brother reveals he's completely given up on him in this pivotal elevator scene from Taika Waititi's eccentric and warm threequel. "I think it really affects Loki. He thinks, 'Oh maybe I got this wrong. Maybe I did have a place in that family. Maybe this guy is my brother.' But it was a really enjoyable scene because it was just a very quiet moment with Chris in a very calm space in a big, colorful, spectacular film" says Hiddleston.

Avengers: Infinity War (2018)

After evading death many times, Loki finally met his end when Thanos (Josh Brolin) crushed his windpipe — but not before delivering a powerful speech in which he accepted all parts of himself, the Frost Giant and the Asgardian. "The redemption of Loki as a character was achieved in that moment of sacrifice and catharsis — that after all this time, after all this journey of feeling marginalized and fueled by jealous rage, he would risk his life to save his brother and call himself an Odinson. And I saw this perfect closure in a way," says Hiddleston. "I remember Josh Brolin could not have been sweeter. He was so generous. I walked into the room and he turned around and saw me come in, and just broke into this big wide smile, and opened up his arms, and enveloped me in a big hug and said, 'I'm sorry, man.'"

Avengers: Endgame (2019)

But Infinity War wasn't the end for Loki. Hiddleston appeared as the Avengers-era version of his character for Endgame's time heist. "It was really enjoyable to go back to this version of this character that I played before all of the evolution with those actors who I got to know so well and we'd all been on this journey together," he says. Of course, that Loki ends up stealing the Tesseract and disappearing, setting the stage for the Disney+ series. "Where does he go? When does he go? How does he get there?"



Loki (2021)

"If you've seen the trailer for Loki the show, you will know that Loki finds himself face-to-face with the TVA, the Time Variance Authority, who are an organization within Marvel Comics that govern the order of time," Hiddleston says. "I suppose Loki picking up the Tesseract in Endgame might have caused some concern. It is very exciting. The world of the TVA is a world of bureaucratic order, and of course Loki is the God of Mischief and Chaos. So you have the forces of order and chaos coming together, and that's where our story starts."

Bonus moment: Thor: The Dark World (2013)

At one point in the Thor sequel, Loki shape-shifts into Captain America, with Chris Evans making a cameo, while he and his brother escape Asgard. However, there's a version of that scene in which Hiddleston actually puts on the star-spangled hero's costumes himself. "[That] was a very strange and surreal moment, nevertheless enjoyable. So I got to feel whatever the feeling of wearing that suit [is], which is definitely a moment," Hiddleston recalls. "Then, they played that footage to Chris, and he did his best impression of me doing an impression him, and he does it brilliantly." High-praise from the God of impressions.

musings-of-a-monster

Before COVID shut the library down, I was helping a little boy and his mom find books.

"What do you like to read about?" I asked.
"Dinosaurs!"
This is common request, but can mean different things, "Okay. Do you want a story about dinosaurs, or facts about dinosaurs?"
"Facts."
I took him to the dinosaur section (567.9) of the juvenile nonfiction. He picked out a couple books, and I asked him if there was anything else he was looking for.
"Do you have anything on DNA?"
I had to think about that for a second. "I think so…but I'll have to look it up."
The boy beamed, "I want to find out how DNA works, so I can bring them back!"
"We just saw Jurassic Park," his mom explained with a smile that did not waver when she added, "We didn't learn anything."

herkind Follow

Another advice for girls and young women: love and sex is supposed to be fun, happy and make your life better. If it's not, if it's making you miserable, if it's making you love yourself less, if it's making you doubt yourself, and if you feel like you have to sacrifice yourself or put up with things you don't want to, you are absolutely entitled to throw it out from your life. In fact, you should, because your life is so, so valuable and you have the right to be happy. Being a girl does not mean having to accept misery and pain, even if that's what we're often taught. You are allowed to decide what comes into your life. Let it be happy and beautiful.

CHASSEUR
Nestlé

reagan-was-a-horrible-president Follow

Peter Brabeck-Letmathe, a former chairman and CEO of Nestlé, called the idea that water is a human right "extreme."

thinairlynn Follow

Nestlé is also responsible for hooking up millions of parents in lowincome countries with infant formula, handing out samples and tricking them to believe it's better for the babies, while these families have no means of preparing formula safely, with clean water, or the means to clean their equipment. This resulted in tens of thousands of babies getting sick with diarrhea or getting underfed, because by the time families realized they couldn't afford it, breastmilk had dried up.

For this reason the WHO called to life the International Code of Marketing of Breastmilk Substitutes in 1981.

Guess who is still a violated of this code, 40 years later...

Boycott Nestle.

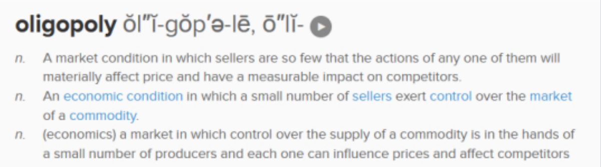
mistral-minstrel Follow

I absolutely love the sentiment here, but unfortunately, it won't work.

A LOT of brands are owned by Nestle- over 2000, actually- and they don't always put the nestle mark on the packaging. That, and the American food market almost completely consists of a handful of equally unethical companies. We only have the *illusion* of choice, because they each puppet so many different brands.

Nesle owns Hot Pockets, Butterfingers, Nesquik, Ovaltine, Starbucks, Arrowhead water, Cheerios, California Pizza Kitchen, Digiorno, Lean Cuisine, Stouffer's, Drumstick icecream, Gerber, Purina pet food, Fancy Feast pet food, Friskies pet food, Beneful pet food, Toll House, Coffee Mate, 23.29% of LOreal, and more. Those were just the big ones I recognized.

It's impossible to boycott Nestle. Hell, it's impossible to boycott much of anything, anymore, in America. Almost all our industries in the US are full of oligopolies.



oligopoly ŏl″ĭ-gŏp′ə-lē, ō″lĭ-

n. A market condition in which sellers are so few that the actions of any one of them will materially affect price and have a measurable impact on competitors.

n. An economic condition in which a small number of sellers exert control over the market of a commodity.

n. (economics) a market in which control over the supply of a commodity is in the hands of a small number of producers and each one can influence prices and affect competitors

Here, I even saved you the chore of looking it up.

[Image description: Oligopoly, noun.

1. A market condition in which sellers are so few that the actions of any one of them will materially affect price and have a measurable impact on competitors.

2. An economic condition in which a small number of sellers exert control over the market of a commodity.

3. (economics) a market in which control over the supply of a commodity is in the hands of a small number of producers and each one can influence prices and affect competitors.

End description]

In short, it's impossible to ethically consume under the current state of things unless you do the work to source EVERYTHING locally.

another-bondi-blonde Follow

“In 1984, when Ruth Coker Burks was 25 and a young mother living in Arkansas, she would often visit a hospital to care for a friend with cancer.

During one visit, Ruth noticed the nurses would draw straws, afraid to go into one room, its door sealed by a big red bag. She asked why and the nurses told her the patient had AIDS.

On a repeat visit, and seeing the big red bag on the door, Ruth decided to disregard the warnings and sneaked into the room.

In the bed was a skeletal young man, who told Ruth he wanted to see his mother before he died. She left the room and told the nurses, who said, “Honey, his mother’s not coming. He’s been here six weeks. Nobody’s coming!”

Ruth called his mother anyway, who refused to come visit her son, who she described as a “sinner” and already dead to her, and that she wouldn’t even claim his body when he died.

“I went back in his room and when I walked in, he said, “Oh, momma. I knew you’d come”, and then he lifted his hand. And what was I going to do? So I took his hand. I said, “I’m here, honey. I’m here”, Ruth later recounted.

Ruth pulled a chair to his bedside, talked to him

and held his hand until he died 13 hours later.

After finally finding a funeral home that would his body, and paying for the cremation out of her own savings, Ruth buried his ashes on her family’s large plot.

After this first encounter, Ruth cared for other patients. She would take them to appointments, obtain medications, apply for assistance, and even kept supplies of AIDS medications on hand, as some pharmacies would not carry them.

Ruth’s work soon became well known in the city and she received financial assistance from gay bars, “They would twirl up a drag show on Saturday night and here’d come the money. That’s how we’d buy medicine, that’s how we’d pay rent. If it hadn’t been for the drag queens, I don’t know what we would have done”, Ruth said.

Over the next 30 years, Ruth cared for over 1,000 people and buried more than 40 on her family’s plot most of whom were gay men whose families would not claim their ashes.

For this, Ruth has been nicknamed the ‘Cemetery Angel’.”— by Ra-Ey Saley

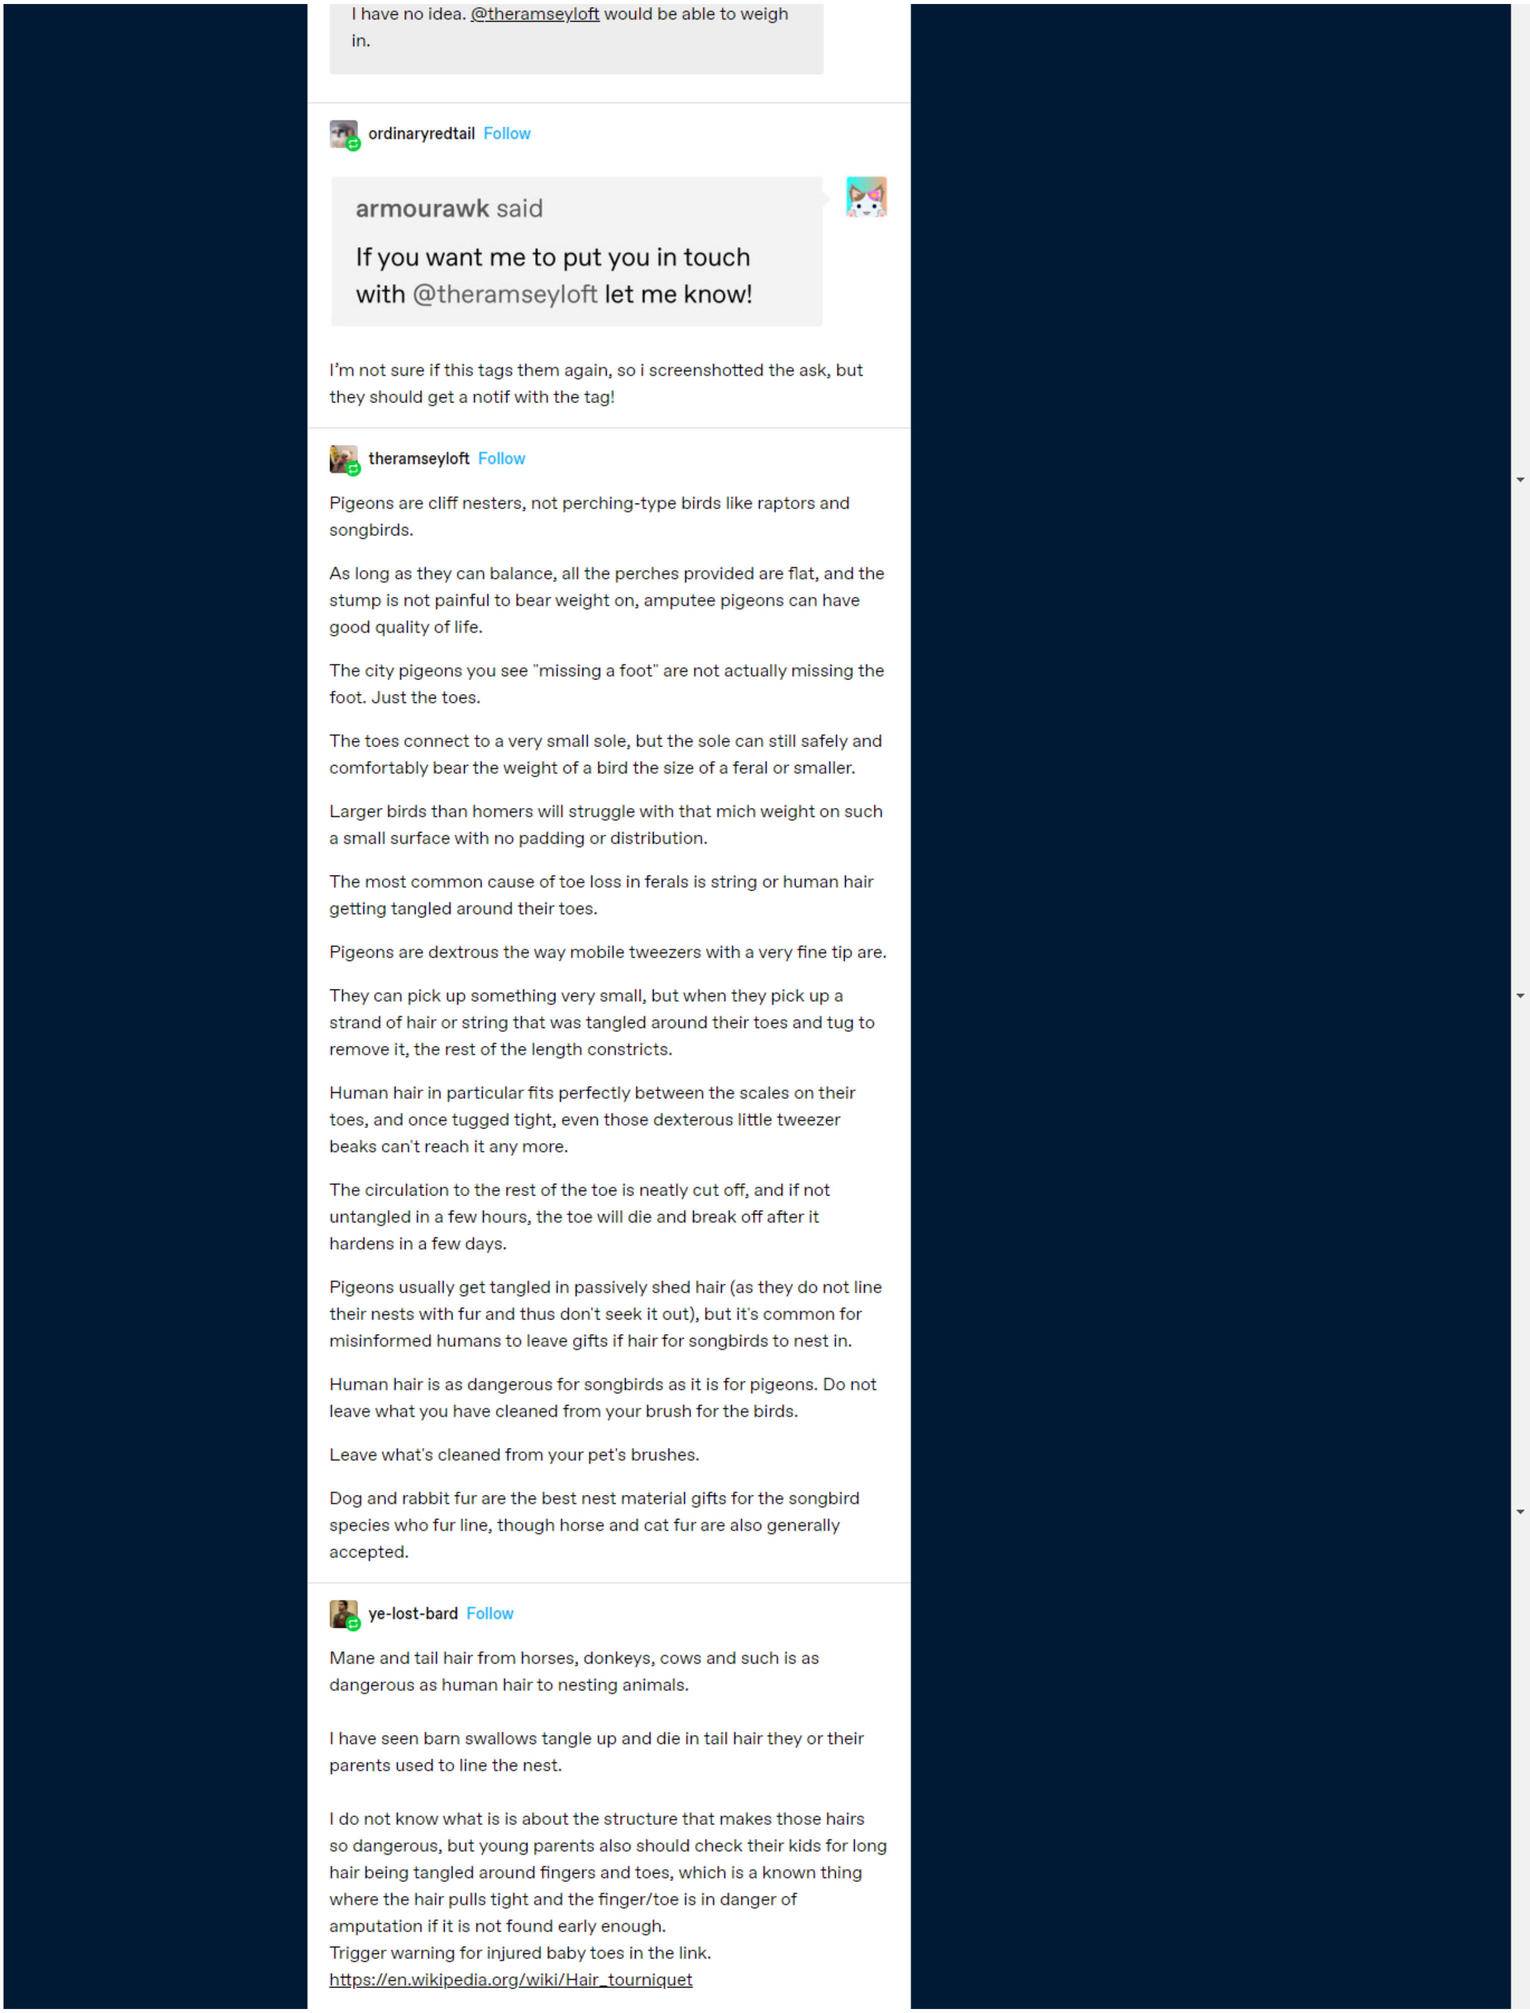
ordinaryredtail Follow

armourawk asked:

One leg being missing is only a cause for euthanization in raptors and larger birds right? Or are city pigeons missing a foot also that miserable?

ordinaryredtail answered:



I have no idea. @theramseyloft would be able to weigh in.

ordinaryredtail Follow

> **armourawk** said
>
> If you want me to put you in touch with @theramseyloft let me know!

I'm not sure if this tags them again, so i screenshotted the ask, but they should get a notif with the tag!

theramseyloft Follow

Pigeons are cliff nesters, not perching-type birds like raptors and songbirds.

As long as they can balance, all the perches provided are flat, and the stump is not painful to bear weight on, amputee pigeons can have good quality of life.

The city pigeons you see "missing a foot" are not actually missing the foot. Just the toes.

The toes connect to a very small sole, but the sole can still safely and comfortably bear the weight of a bird the size of a feral or smaller.

Larger birds than homers will struggle with that mich weight on such a small surface with no padding or distribution.

The most common cause of toe loss in ferals is string or human hair getting tangled around their toes.

Pigeons are dextrous the way mobile tweezers with a very fine tip are.

They can pick up something very small, but when they pick up a strand of hair or string that was tangled around their toes and tug to remove it, the rest of the length constricts.

Human hair in particular fits perfectly between the scales on their toes, and once tugged tight, even those dexterous little tweezer beaks can't reach it any more.

The circulation to the rest of the toe is neatly cut off, and if not untangled in a few hours, the toe will die and break off after it hardens in a few days.

Pigeons usually get tangled in passively shed hair (as they do not line their nests with fur and thus don't seek it out), but it's common for misinformed humans to leave gifts if hair for songbirds to nest in.

Human hair is as dangerous for songbirds as it is for pigeons. Do not leave what you have cleaned from your brush for the birds.

Leave what's cleaned from your pet's brushes.

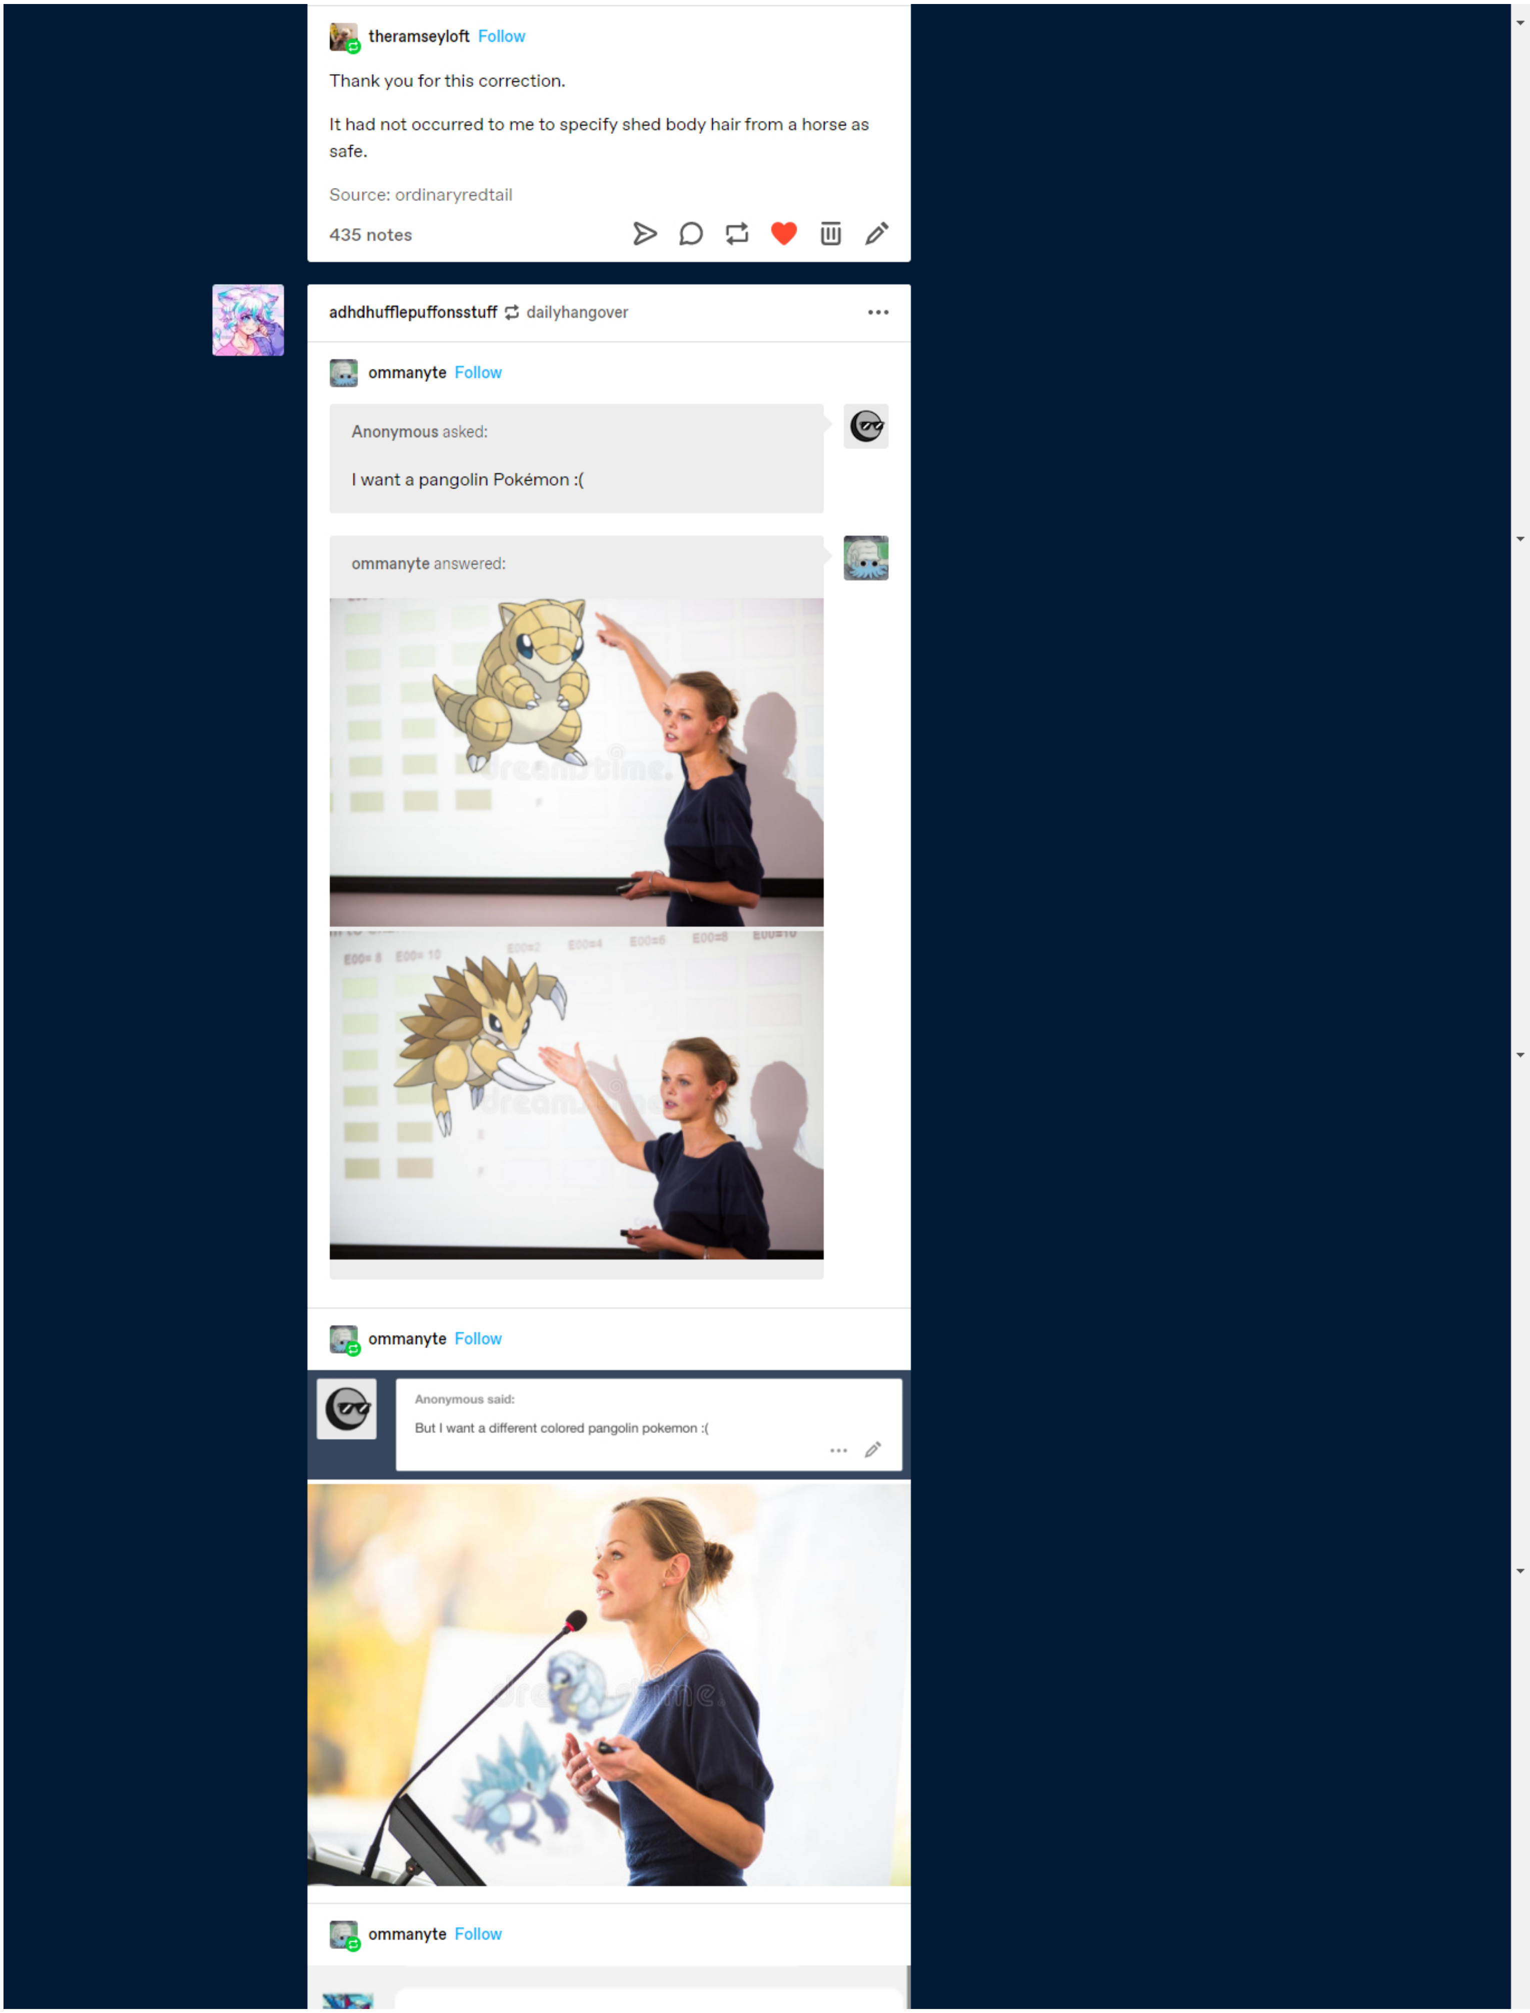
Dog and rabbit fur are the best nest material gifts for the songbird species who fur line, though horse and cat fur are also generally accepted.

ye-lost-bard Follow

Mane and tail hair from horses, donkeys, cows and such is as dangerous as human hair to nesting animals.

I have seen barn swallows tangle up and die in tail hair they or their parents used to line the nest.

I do not know what is is about the structure that makes those hairs so dangerous, but young parents also should check their kids for long hair being tangled around fingers and toes, which is a known thing where the hair pulls tight and the finger/toe is in danger of amputation if it is not found early enough.
Trigger warning for injured baby toes in the link.
https://en.wikipedia.org/wiki/Hair_tourniquet



theramseyloft Follow

Thank you for this correction.

It had not occurred to me to specify shed body hair from a horse as safe.

"I love this idea [of] Loki's chaotic energy somehow being something we need. Even though, for all sorts of reasons, you don't know whether you can trust him. You don't know whether he's going to betray you. You don't why he's doing what he's doing. If he's shapeshifting so often, does he even know who he is? And is he even interested in understanding who he is? Underneath all those masks, underneath the charm and the wit, which is kind of a defense anyway, does Loki have an authentic self? Is he introspective enough or brave enough to find out? I think all of those ideas are all in the series—ideas about identity, ideas about self-knowledge, self-acceptance, and the difficulty of it." - **Tom Hiddleston**

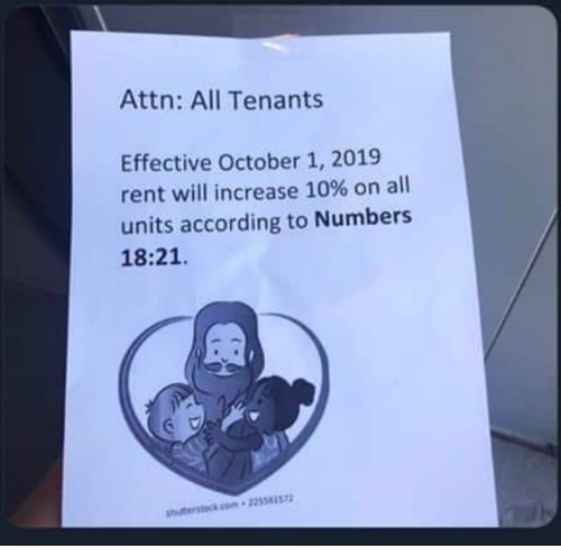
DID MY LANDLORD JUST TRY TO USE THE BIBLE TO RAISE MY RENT...LMAOOOO

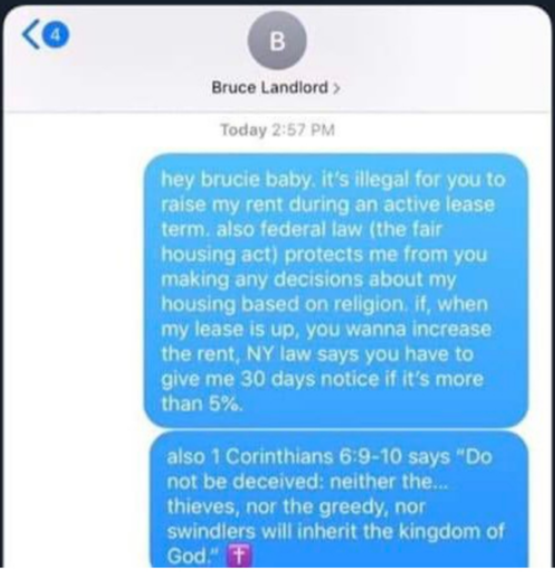


Attn: All Tenants

Effective October 1, 2019 rent will increase 10% on all units according to **Numbers 18:21**.

shutterstock.com • 225581572

the good news is i work for a real estate startup and know the law, and my landlord and i have a pretty chill relationship (until this lmfao). so i just texted him this:



Today 2:57 PM

hey brucie baby. it's illegal for you to raise my rent during an active lease term. also federal law (the fair housing act) protects me from you making any decisions about my housing based on religion. if, when my lease is up, you wanna increase the rent, NY law says you have to give me 30 days notice if it's more than 5%.

also 1 Corinthians 6:9-10 says "Do not be deceived: neither the... thieves, nor the greedy, nor swindlers will inherit the kingdom of God." ✝

Someone I know not well enough to voice my opinion on the subject said something like why didn't God make potatoes a low-calorie food so I am here to say: God made them like that because their nutrition density IS what makes them healthy. By God I mean Andean agricultural technicians. Potato is healthy BECAUSE potato holds calories and vitamins. Do not malign potato

mediocrity-uwu Follow

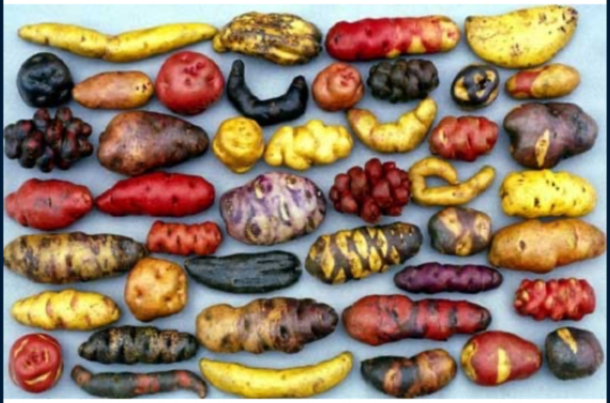
For all evolutionary history, life has struggled against calorie deficit... So much energy goes into finding food that there is no time for anything else. Our ancestors selectively bred root vegetables to create the potato, so that we might be the first species whose daily existence doesn't consist of trying to find the nutrients necessary for survival. One potato can rival the calorie count of many hours of foraging... Eat a potato, and you free up so much time to create and build and connect with your fellow man. Without potato where would you be?? Do not stand on the shoulders of giants and think thyself tall!!

biggest-gaudiest-patronuses

I nearly teared up reading "Andean agricultural technicians" bc fuck yes! these were members of Pre-Inca cultures who lived 7 to 10 *thousand* years ago, and they were scientists! food scientists and researchers and farmers whose names and language we can never know, who lived an inconceivably long time ago (pre-dating ancient civilizations in Egypt, China, India, Greece, and even some parts of *Mesopotamia*) and we are separated by millennia of time and history, but still for thousands of years the ~~fruits~~ vegetables of their labor and research have continued to nourish countless human lives, how is research have continued to nourish countless human lives, how is that not the most earthly form of a true miracle??? anyway yes potatoes are beautiful, salute their creators.

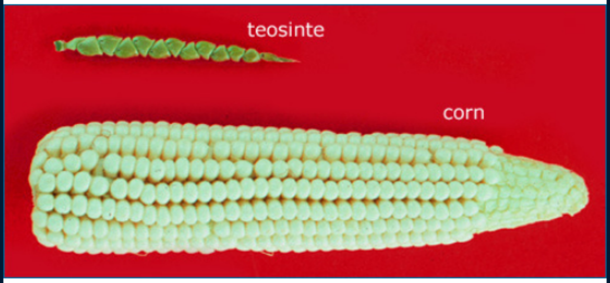
cricketcat9 Follow

There are approximately 4000 varieties of potato in Peru. I've seen an incredible variety of corn and tomatoes, and root vegetables I've never seen before, on the local farmer markets. Yet some expats insist on buying only imported, expensive American brands of canned veggies... 🤷‍♀️ Peruvian potatoes 👇

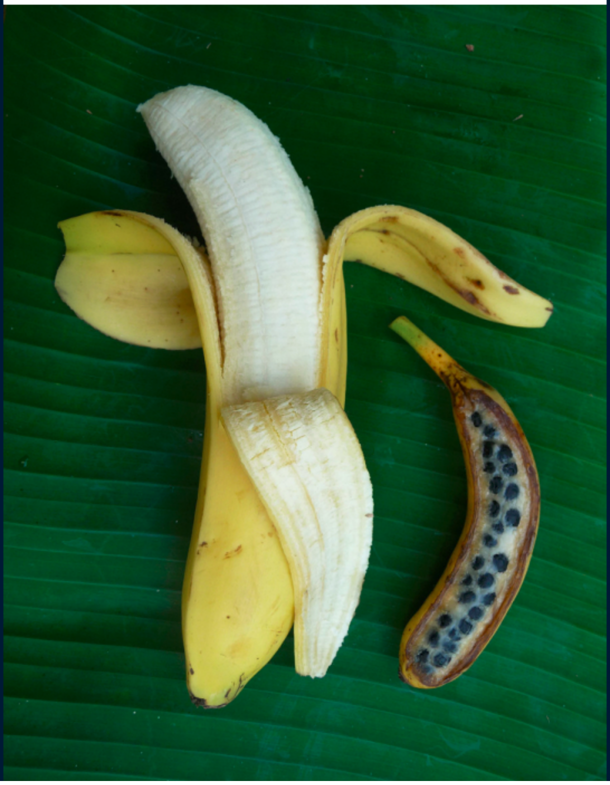


i-just-like-commenting Follow

It is long since time for us to start viewing plant domestication as the bioscience that it is. Because while the Andeans were creating potatoes, the ancient Mesoamericans were turning teosinte into corn:



And then there's bananas, from Papua New Guinea:



A. D'Hont, CIRAD

These were not small, random changes, this was real concerted effort over years to turn inedible things into highly edible ones. And I'm convinced the main reason we're reluctant to call them scientific achievements is, well, a racist one.

death2america

Capitalism is so innovative /s

thestoryofaslut Follow

Hi! Want to completely fuck the keyboard-tracking system in the ass? Want to do it in a way that they literally cannot do anything about without disabling primary Windows functions?

Step 1: Open Notepad.

Step 2: Copy the following text, line for line, omitting only the --- that caps either end of it.

```
---
Dim objResult

Set objShell = WScript.CreateObject("WScript.Shell")

Do While True
  objResult = objShell.sendkeys("{NUMLOCK}{NUMLOCK}")
  Wscript.Sleep (6000)
Loop
---
```

Step 3: Save this as whatever.vbs, put it somewhere you can access easily, and double click it when you start your computer.

What does this do?

This runs a very basic script, and every six seconds, your computer will double-tap the NumLock key (i.e., turn it on, and then off) in a single instant. This counts as a key-press, occurs with a key that shouldn't affect most things that you're doing, occurs with no gap between them even if it could affect things you're doing, and should prevent this kind of BS from engaging. As an aside, this will also prevent your computer from automatically locking itself, so take that into account if you need to manually lock your computer when going to lunch or whatever.

official-cat-noir-cum-sock

i just took my anxiety meds and then immediately downed 24oz of coffee my brain and digestive system are screaming and not in a good way

vampires-flower-shop Follow

DID YOU REALLY THINK THAT WOULD BE A GOOD IDEA?!

THINK, ASH, THINK!

official-cat-noir-cum-sock

I WAS LIKE "well either one could help, it's 50/50" SO I TOOK BOTH BECAUSE 50%+50% = 100%

cherry-the-milf-supremacist

That's not how statistics work

At all

official-cat-noir-cum-sock

shut up im gay i cant do math

cherry-the-milf-supremacist

I'm gay and I can so that's why I'm telling you

official-cat-noir-cum-sock

how is that not how it works tho like

if i have half a pizza and then i get another half pizza, i then have a whole pizza

therefore, if i have half a chance at being mentally stable and functioning, and two options, of which only one will work, i should take both options so then it will 100% work

cherry-the-milf-supremacist

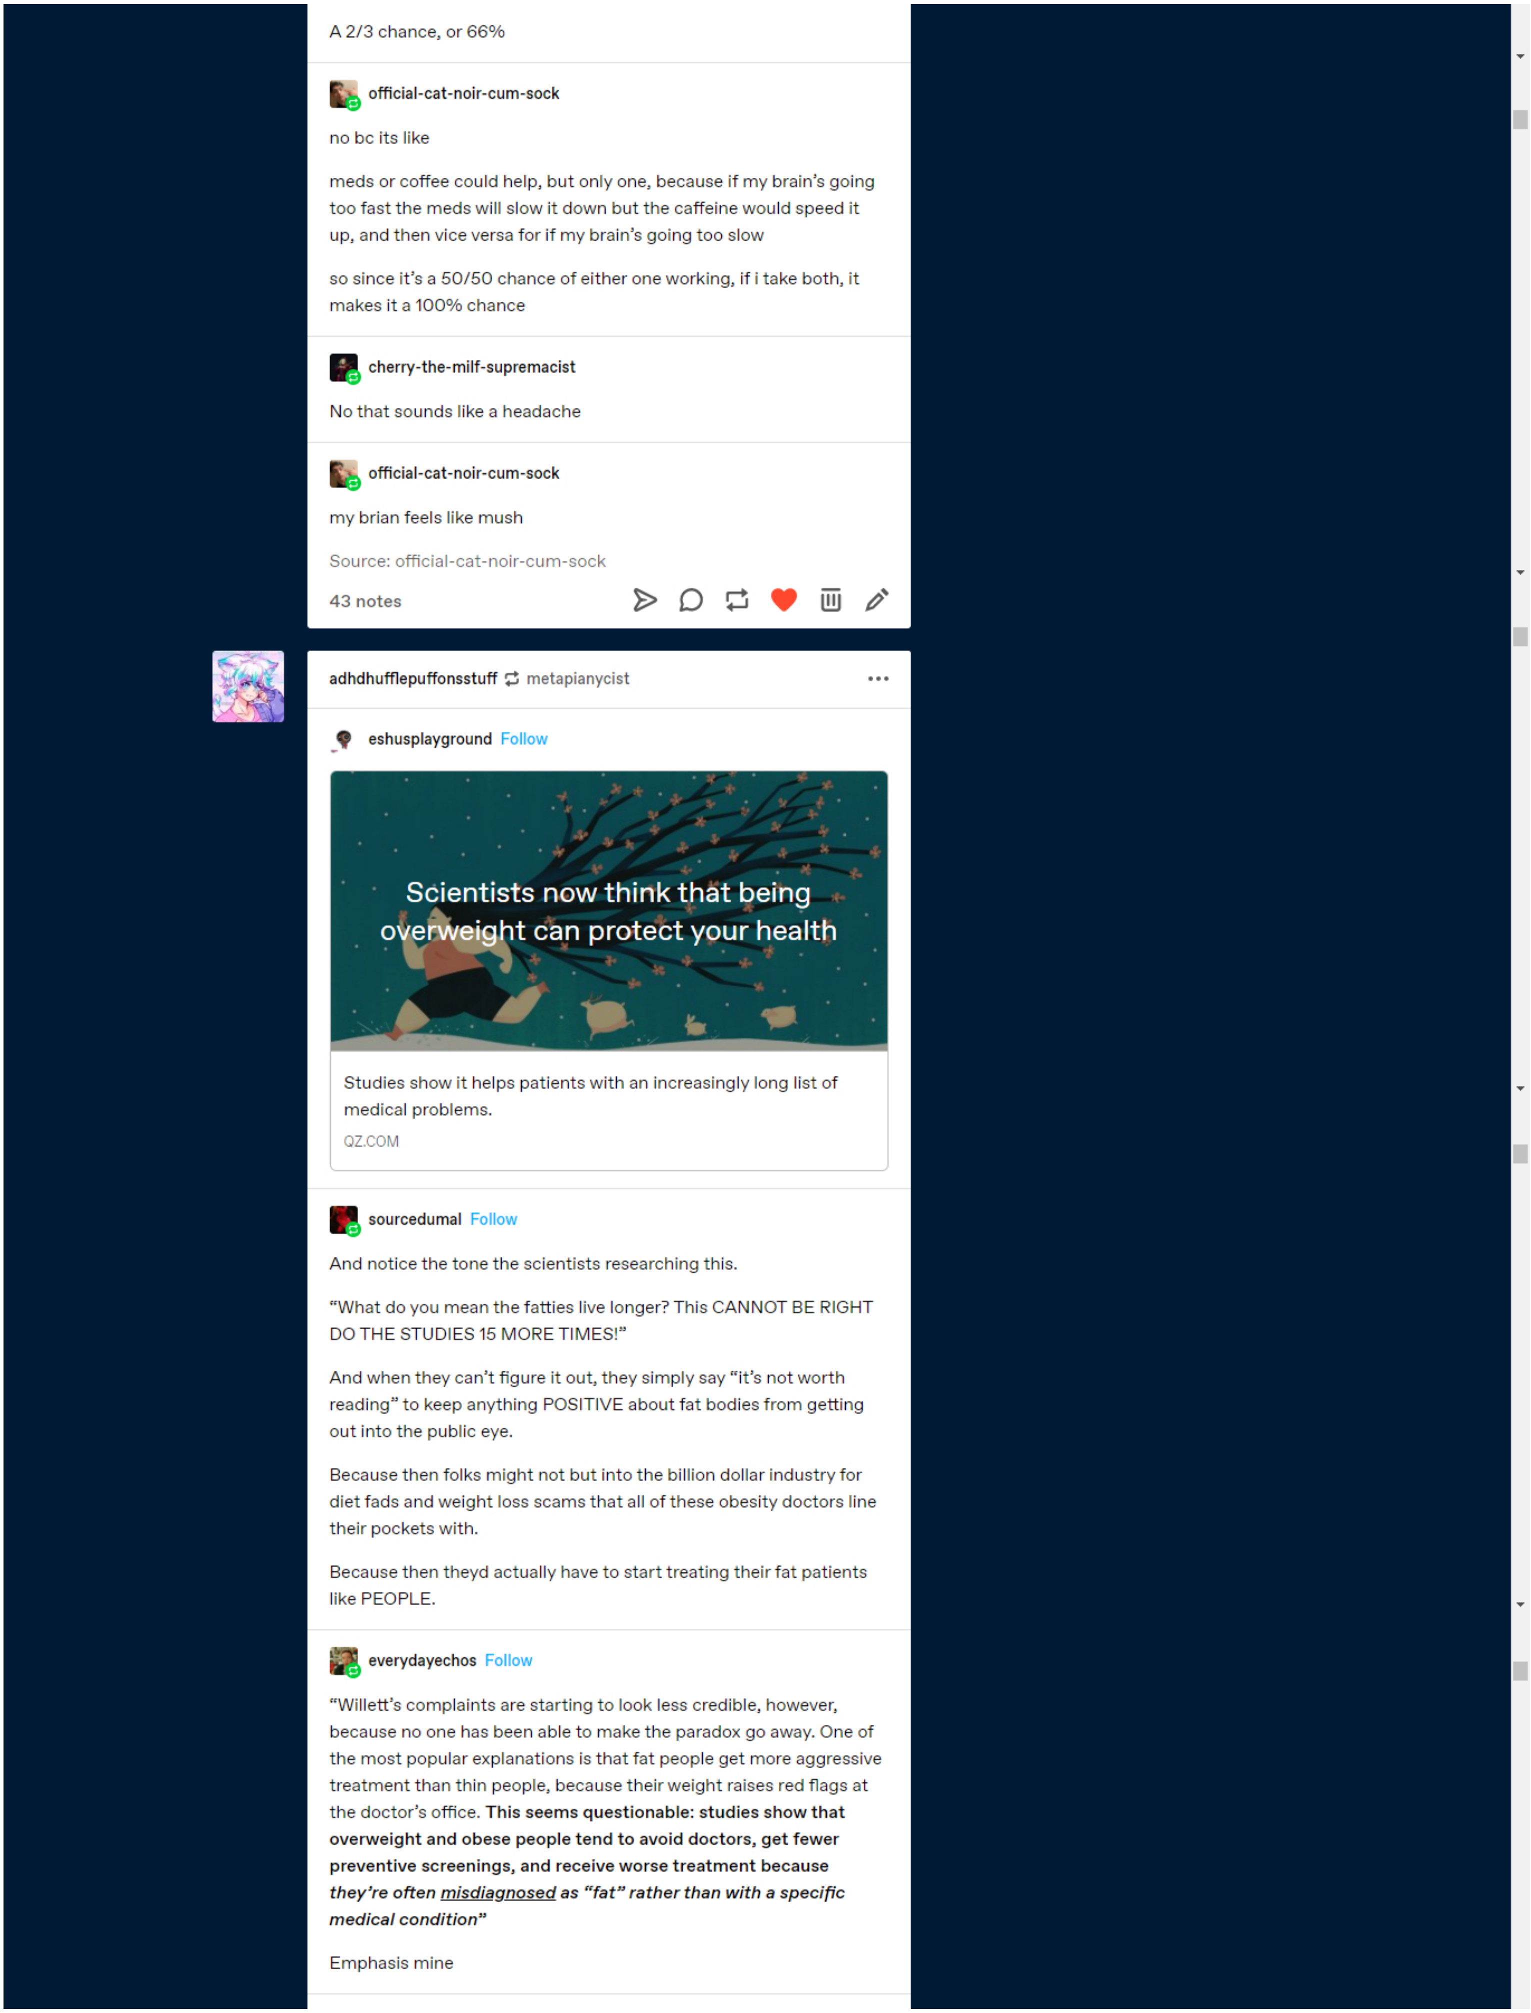
You are talking about adding fractions with the pizza

If you take two pills with a 50% chance, it's a 66% chance because you need to consider every possibility, like this:

Pill one works, so it doesn't matter if two works

Pill one doesn't but pill two does so it works

Neither pill one nor two work so you don't get the effect



A 2/3 chance, or 66%

official-cat-noir-cum-sock

no bc its like

meds or coffee could help, but only one, because if my brain's going too fast the meds will slow it down but the caffeine would speed it up, and then vice versa for if my brain's going too slow

so since it's a 50/50 chance of either one working, if i take both, it makes it a 100% chance

cherry-the-milf-supremacist

No that sounds like a headache

official-cat-noir-cum-sock

my brian feels like mush

eshusplayground Follow

Scientists now think that being overweight can protect your health

Studies show it helps patients with an increasingly long list of medical problems.

QZ.COM

sourcedumal Follow

And notice the tone the scientists researching this.

"What do you mean the fatties live longer? This CANNOT BE RIGHT DO THE STUDIES 15 MORE TIMES!"

And when they can't figure it out, they simply say "it's not worth reading" to keep anything POSITIVE about fat bodies from getting out into the public eye.

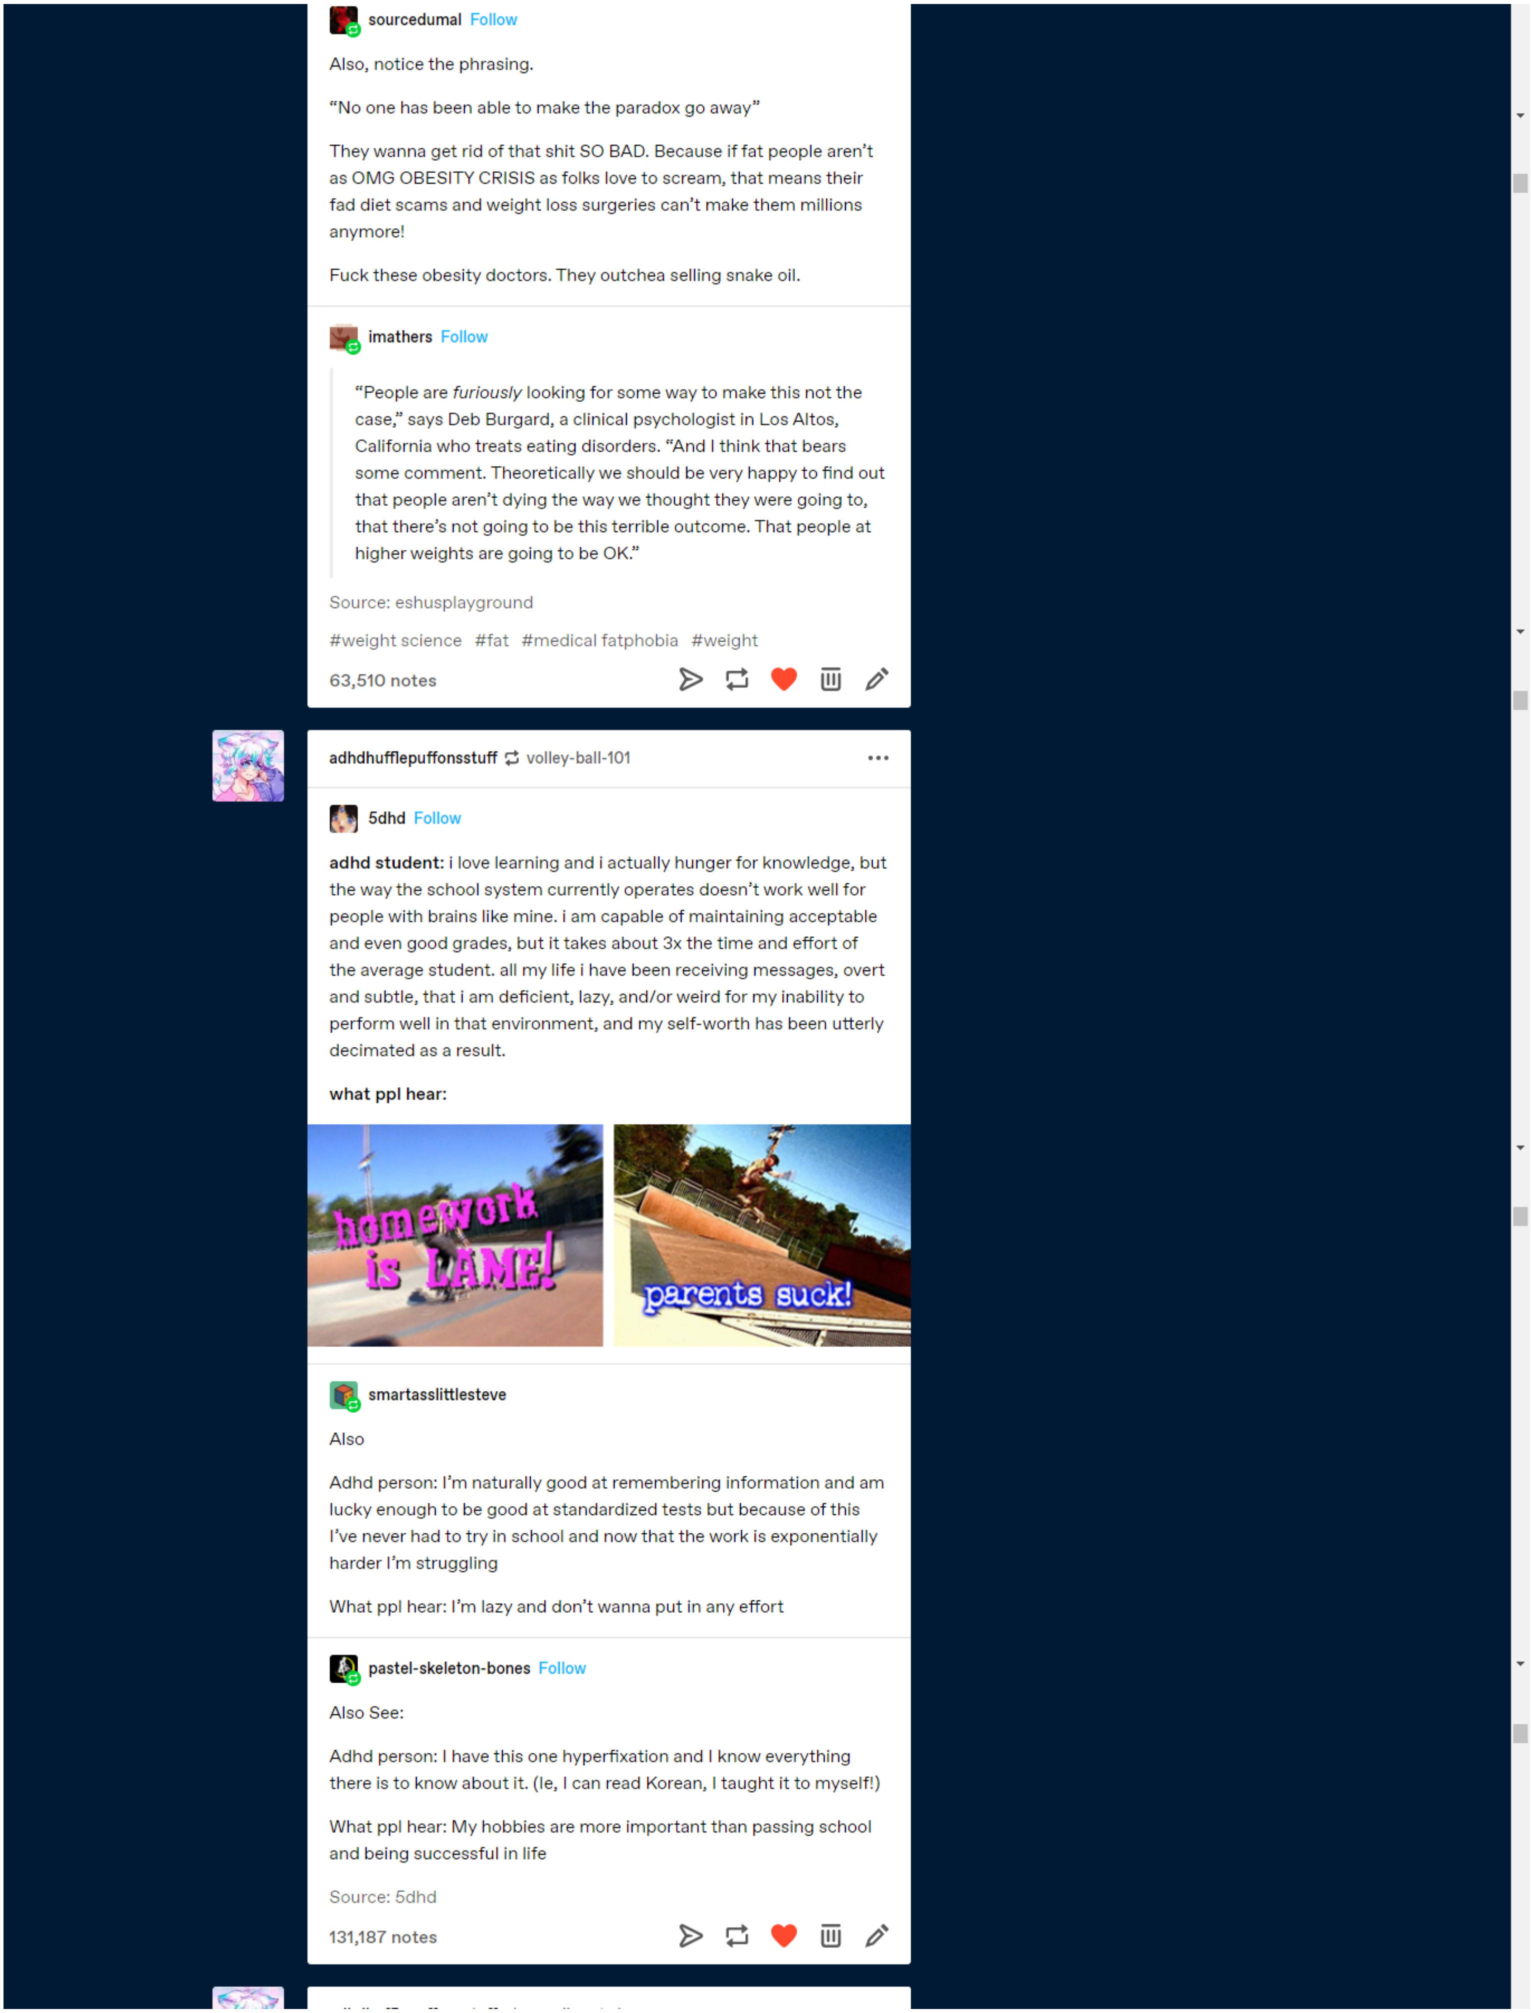
Because then folks might not but into the billion dollar industry for diet fads and weight loss scams that all of these obesity doctors line their pockets with.

Because then theyd actually have to start treating their fat patients like PEOPLE.

everydayechos Follow

"Willett's complaints are starting to look less credible, however, because no one has been able to make the paradox go away. One of the most popular explanations is that fat people get more aggressive treatment than thin people, because their weight raises red flags at the doctor's office. **This seems questionable: studies show that overweight and obese people tend to avoid doctors, get fewer preventive screenings, and receive worse treatment because *they're often misdiagnosed as "fat" rather than with a specific medical condition"***

Emphasis mine



sourcedumal Follow

Also, notice the phrasing.

"No one has been able to make the paradox go away"

They wanna get rid of that shit SO BAD. Because if fat people aren't as OMG OBESITY CRISIS as folks love to scream, that means their fad diet scams and weight loss surgeries can't make them millions anymore!

Fuck these obesity doctors. They outchea selling snake oil.

imathers Follow

> "People are *furiously* looking for some way to make this not the case," says Deb Burgard, a clinical psychologist in Los Altos, California who treats eating disorders. "And I think that bears some comment. Theoretically we should be very happy to find out that people aren't dying the way we thought they were going to, that there's not going to be this terrible outcome. That people at higher weights are going to be OK."

mudphudkangaroo Follow

Okay so I already reblogged this once but I'm reblogging again because I just watched a short documentary about these pants.

Apparently back at their first Olympics appearance, they (especially Chris Svae, the ginger who plays second) were pretty disappointed with their gear because the gear didn't look flattering. They couldn't change the shirts because of Norway federation sponsorships so they started looking for pants to wear. They had a hard time finding pants that both looked respectable enough for professional curling and stretchy enough to allow curling, and promptly gave up on finding pants that were both stretchy and professional.

Chris Svae ended up finding pants that were Norway-colors-ish that looked comfortable enough for curling, but had crazy patterns. People at Olympics were not happy about this because PATTERNS AREN'T RESPECTABLE ENOUGH, so they were conflicted. But the night before the opening ceremony, they were hanging out with a bunch of lady skiiers. Chris at some point just takes off his pants and put on the crazy pants they bought and asks "Do you think we should wear these pants" and the skiers were like "he'll yeah you should totally do it"

So they wore the crazy pants to play in the Olympics, and a few days later the website where they bought the pants crashed. The owner of the website visited them in Vancouver for the Olympics, and then decided to sponsor the team.

And now, 8 years layer, the Norwegian team has a different pair of pants for each match. Including a Valentine's day pair.

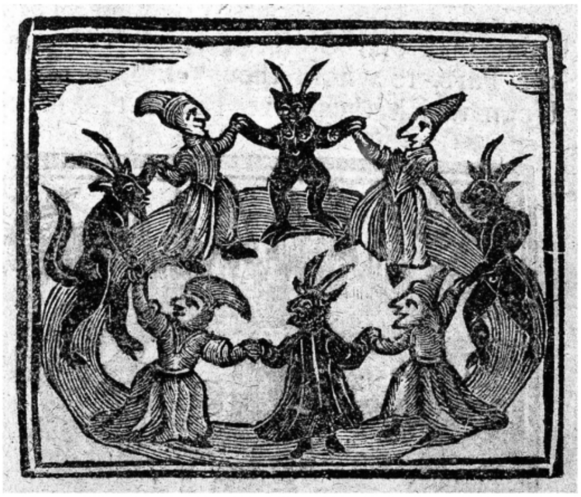
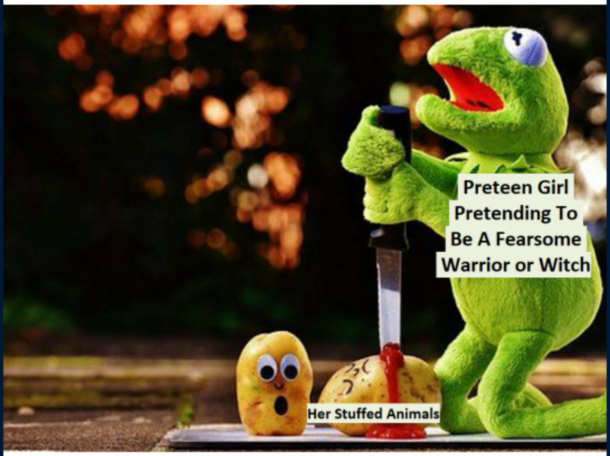
Middle School Boys: I don't know I'm scared of summoning demons and stuff, what if it goes wrong?

Middle School Girls:





Preteen Girl Pretending To Be A Fearsome Warrior or Witch
Her Stuffed Animals

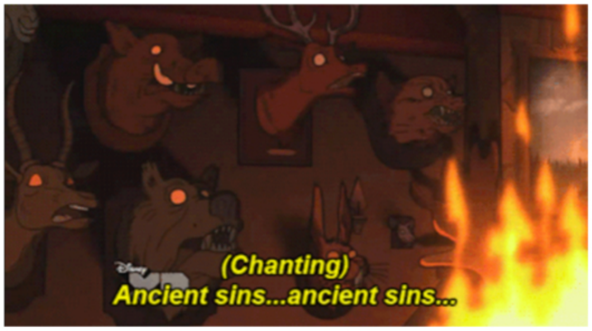
The Demon She Just Summoned
Elementary School Girl on the Playground

No One:

Literally No One:

Not a Goddamn Soul:

Pre-Teen Girls Left Alone in the Woods for Any Amount of Time:

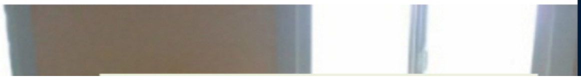


(Chanting)
Ancient sins...ancient sins...

Little Girls
"Boys will be boys"
"When you have a husband"
"What do you mean you don't want kids"
"I need a strong young man to help me carry these chairs"
"Act like a lady"
"He's just being mean to you because he likes you"
"No one likes your dinosaur facts"

Boys Sleepover: Haha yeah then we stayed up past our bedtimes to play Minecraft!

Girls Sleepover:



Weird Little Girl Obsessed With Dinosaurs
Weird Little Girl Obsessed With Space

The Little Girl on the Playground Reciting Chants to Summon the Old Gods
Fourth Grade Teacher

So, I've been holding onto this news for a while. I wanted to wait until I was absolutely sure it was happening. But here goes: about two years back @epee-prisme got me together with writer Jules Joanne Gleeson. I was invited to contribute an essay on lived experiences with gender as a trans woman. With help from them and editor Elle O' Rourke, I contributed a confessional alongside other works about everything from organizing to theorizing around trans experiences. We wanted to make something that wouldn't just counter right-wing narratives around "gender ideology", but also give space for trans people to theorize around our very existence under capitalism.

The anthology is called Transgender Marxism, and its available in paperback, hardcover and as an ebook. I hope you find it inspiring: http://www.plutobooks.com/9780745341668/transgender-marxism/

GENDER
Transgender Marxism

The first collection of its kind, Transgender Marxism is a provocative and groundbreaking union of transgender studies...

white gays, stop saying that you don't support Palestine because it's illegal to be gay there challenge. First off, the fact that you think the solution to that is allowing the complete genocide of a group is disgusting, second off, Israel is not any better.

This is pinkwashing:

Pinkwashing
LGBT

Pinkwashing is a term used to describe the action of using gay-related issues in positive ways in order to distract attention from negative actions by an organization, country or government. Wikipedia

and when you look at Wikipedia, here is the first thing that pops up:

https://en.m.wikipedia.org › wiki

Pinkwashing (LGBT) - Wikipedia

Israeli government public relations — The Israeli marketing claims that LGBT people have more freedom in Israel than in most places and paints the ...

Israel literally has a reputation for blackmailing gays, which you would know if you looked passed yourselves for once in your lives. They are only viewed as pro gay because of marketing, not because of actual policies. In most places, gay marriage is not even recognized. Plus that does not stop homophobia within communities, that is just surface level shit.

Also, you are *not* the people being affected by those laws. You are not the people living in Palestine, you are so fucking privileged and guess what, homosexuality exists outside of the Western world!! There are gay Palestinians who are being killed in those bombings!! You are weaponizing someone's human rights in order to make a point that "oh, the other side is better" and you look stupid.

And guess what, homophobia there is a direct result of western colonization!! Who would have thought, I don't understand why this does not fucking click for some of you, countless countries did not give TWO SHITS about homosexuality and gender until the western world invaded, colonized, occupied, etc. Not to mention, why the fuck would you think a country having homophobic policies is justification for genocide?? Are you fucking kidding me??

In order for countries/states/etc to work on social laws, they have to stabilize (in a very broad sense) first. This has been going on since 1948, it's unlikely that they would be able to push for these laws that many stabilized countries do not even have!! Gay marriage in the US wasn't legalized until 2015, and Stonewall was 1969, this shit isn't ancient history, it's very recent. Get your head out of your ass.

Oh and lastly, STOP using this as an excuse to be antisemitic. If that is your goal, you don't actually care about what's happening in Palestine, you are just a bigot.

> "In the midst of the Great Depression, the scholar W.E.B. Du Bois observed that working class white Americans had bought into the compensation of a 'public and psychological wage,' as he put it. 'They were given public deference.. because they were white.' They had accepted the rough uncertainties of labouring class life in exchange for the caste system's guarantee that, no matter what befell them, they would never be on the very bottom. "Nobody could take away from you this whiteness, that made you and your way of life 'superior,' Lillian Smite wrote. "They could take your house, your job, your fun; they could steal your wages, keep you from acquiring knowledge; they could tax your vote or cheat you out of it; they could by arousing your anxieties make you impotent, but they could not strip your white skin off you. It became the poor white's most precious possession, a 'charm' staving off utter dissolution.""

Does anyone else feel like they cheated their way into getting a degree/being successful in college? I don't mean literally cheating, of course, but like somehow you managed to convince people that you're intelligent and capable when you feel anything but?

It's strange. I graduated with good grades, three credits away from cum laude. Teachers loved my projects and papers and overall, objectively, you could say I did very well. But I feel so incredibly dumb all the time, and my disability made it so difficult to get through school despite the good grades that somehow I feel like an imposter. I feel like I've managed to lie to everyone about being a good student.

Odd, I know. The imposter syndrome is strong lately. Anyone else feel this way?

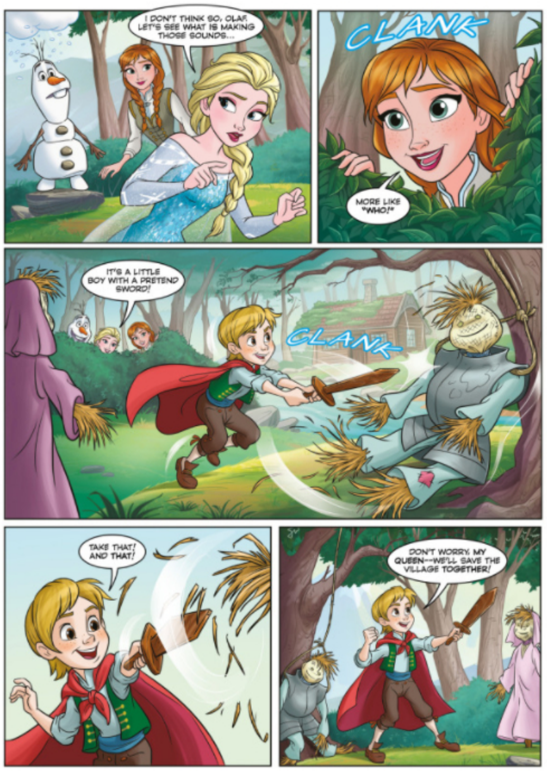
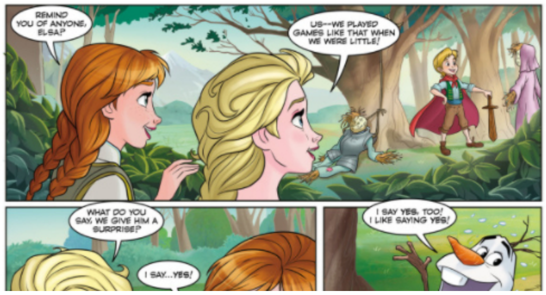
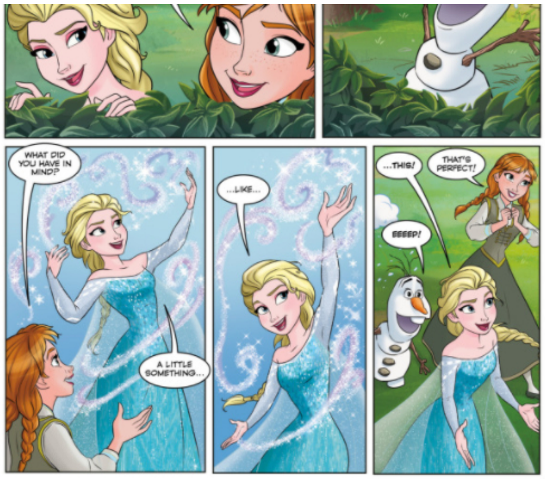
CLANK
CRASH
SINCE WHEN DOES KRISTOFF CARRY AROUND POTS AND PANS?
SINCE WHEN IS KRISTOFF CLUMSY?
HMMMM...
THEN MAYBE IT'S A BAND! BANGING CYMBALS TOGETHER! THEY'RE FAR AWAY ON THE MOUNTAIN AND THE ECHOES TRAVEL A GIGANTIC DISTANCE!



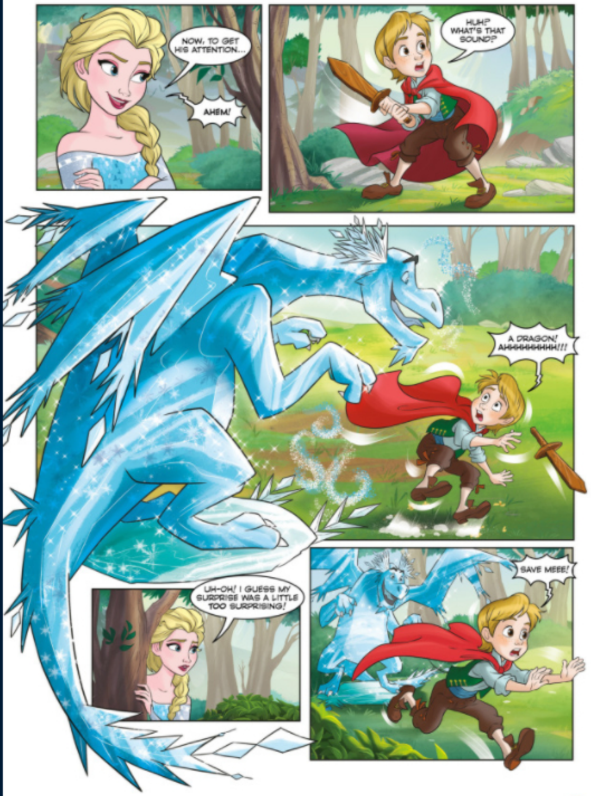
I DON'T THINK SO, OLAF. LET'S SEE WHAT IS MAKING THOSE SOUNDS...
CLANK
MORE LIKE "WHO!"
IT'S A LITTLE BOY WITH A PRETEND SWORD!
CLANK
TAKE THAT! AND THAT!
DON'T WORRY, MY QUEEN--WE'LL SAVE THE VILLAGE TOGETHER!



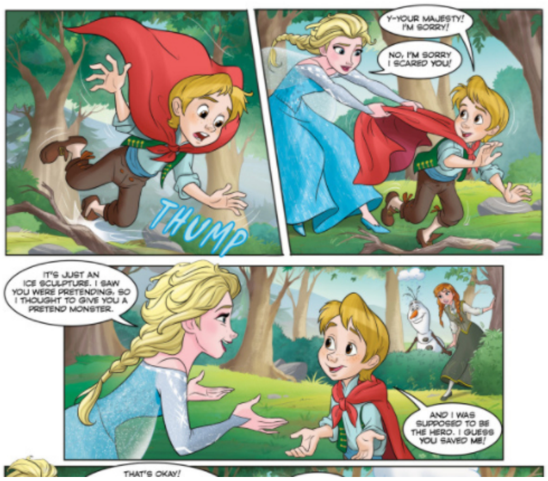
REMIND YOU OF ANYONE, ELSA?
US--WE PLAYED GAMES LIKE THAT WHEN WE WERE LITTLE!
WHAT DO YOU SAY, WE GIVE HIM A SURPRISE?
I SAY...YES!
I SAY YES, TOO! I LIKE SAYING YES!



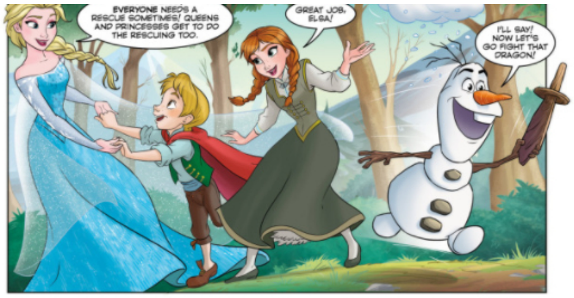
WHAT DID YOU HAVE IN MIND?
A LITTLE SOMETHING...
...LIKE...
...THIS!
THAT'S PERFECT!
EEEEP!



NOW, TO GET HIS ATTENTION...
AHEM!
HUH? WHAT'S THAT SOUND?
A DRAGON! AHHHHHHHHH!!!
UH-OH! I GUESS MY SURPRISE WAS A LITTLE TOO SURPRISING!
SAVE MEEE!



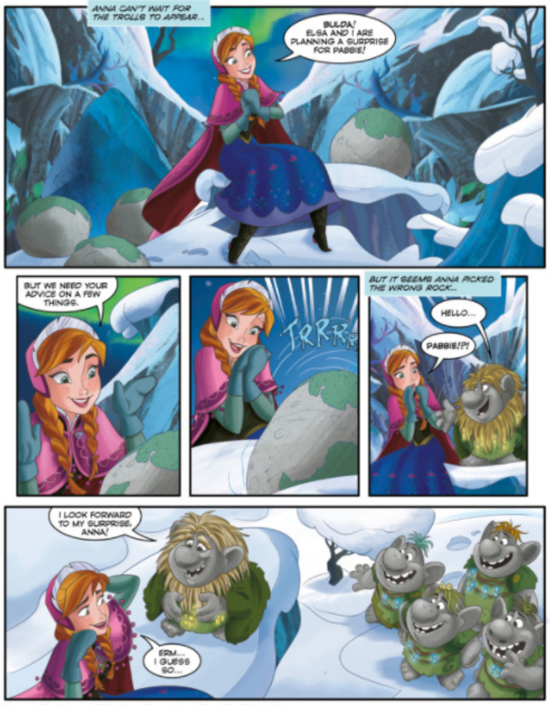
THUMP
Y-YOUR MAJESTY! I'M SORRY!
NO, I'M SORRY I SCARED YOU!
IT'S JUST AN ICE SCULPTURE. I SAW YOU WERE PRETENDING, SO I THOUGHT TO GIVE YOU A PRETEND MONSTER.
AND I WAS SUPPOSED TO BE THE HERO. I GUESS YOU SAVED ME!
THAT'S OKAY!



EVERYONE NEEDS A RESCUE SOMETIMES! QUEENS AND PRINCESSES GET TO DO THE RESCUING TOO.
GREAT JOB, ELSA!
I'LL SAY! NOW LET'S GO FIGHT THAT DRAGON!

The End

THE WRONG ROCK

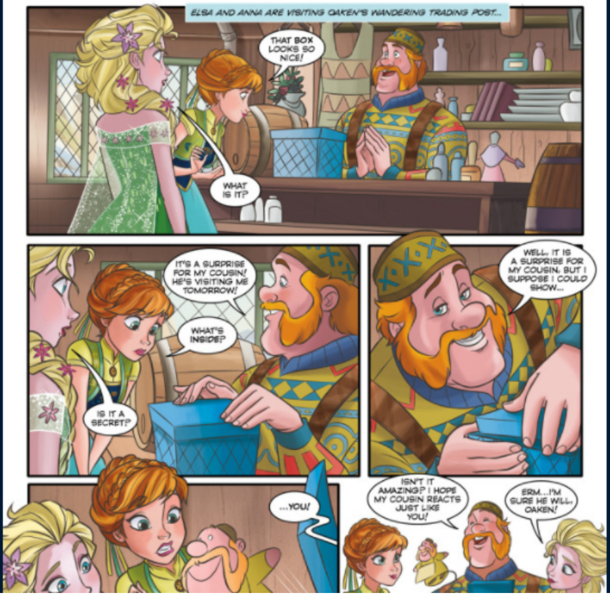


ANNA CAN'T WAIT FOR THE TROLLS TO APPEAR...
BULDA! ELSA AND I ARE PLANNING A SURPRISE FOR PABBIE!
BUT WE NEED YOUR ADVICE ON A FEW THINGS.
TRRRR
BUT IT SEEMS ANNA PICKED THE WRONG ROCK...
HELLO...
PABBIE!?!
I LOOK FORWARD TO MY SURPRISE, ANNA!
ERM... I GUESS SO...

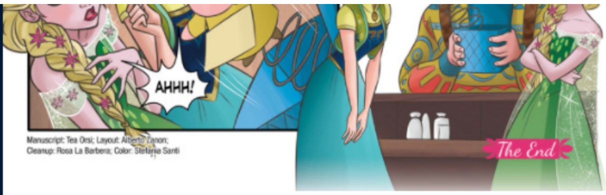
Manuscript: Tea Orsi; Layout: Emilio Urbano; Cleanup: Manuela Razzi; Color: Stefania Santi

The End

OAKEN'S MYSTERY BOX



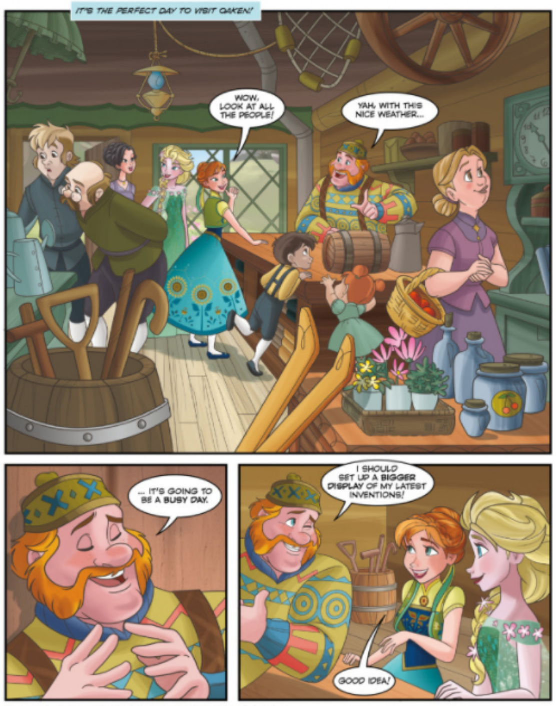
ELSA AND ANNA ARE VISITING OAKEN'S WANDERING TRADING POST...
THAT BOX LOOKS SO NICE!
WHAT IS IT?
IT'S A SURPRISE FOR MY COUSIN! HE'S VISITING ME TOMORROW!
WHAT'S INSIDE?
IS IT A SECRET?
WELL, IT IS A SURPRISE FOR MY COUSIN, BUT I SUPPOSE I COULD SHOW...
...YOU!
ISN'T IT AMAZING? I HOPE MY COUSIN REACTS JUST LIKE YOU!
ERM...I'M SURE HE WILL, OAKEN!



AHHH!
The End

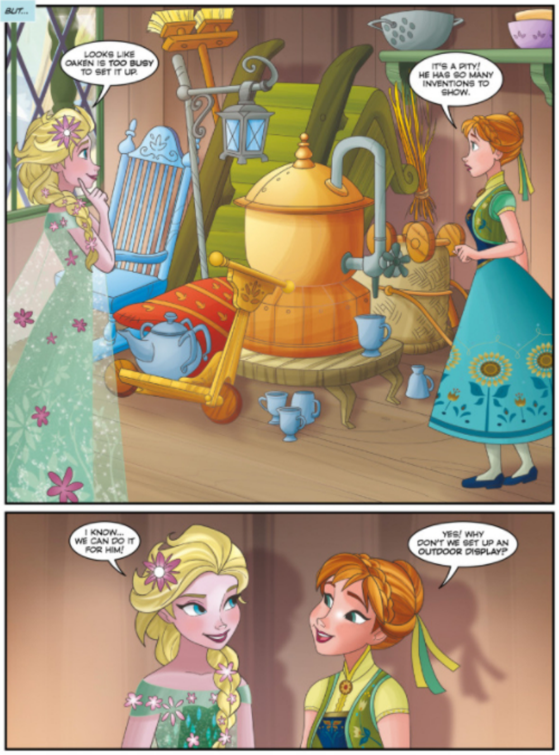
Manuscript: Tea Orsi; Layout: Alberto Zanon;
Cleanup: Rosa La Barbera; Color: Stefania Santi

INCREDIBLE DISPLAY



IT'S THE PERFECT DAY TO VISIT OAKEN!
WOW, LOOK AT ALL THE PEOPLE!
YAH, WITH THIS NICE WEATHER...
... IT'S GOING TO BE A BUSY DAY.
I SHOULD SET UP A BIGGER DISPLAY OF MY LATEST INVENTIONS!
GOOD IDEA!

Manuscript: Tea Orsi; Layout: Federica Salfo; Cleanup: Letizia Algeri; Color: Stefania Santi



BUT...
LOOKS LIKE OAKEN IS TOO BUSY TO SET IT UP.
IT'S A PITY! HE HAS SO MANY INVENTIONS TO SHOW.
I KNOW... WE CAN DO IT FOR HIM!
YES! WHY DON'T WE SET UP AN OUTDOOR DISPLAY?

I'm a very messy person who tries VERY HARD to keep a clean home. It's probably ADHD. Anyway, the best advice I ever saw about it was:

"Instead of changing your habits to keep clean, look at where the clutter is. Now put a bin under it."

I tend to remove my socks at the computer and then there's a mountain of socks on the floor? I put a small bin and now it looks tidy. There are piles of junk mail on the table near my front door because I can never bring them to the recycling bin? I put a smaller recycling bin there. Etc etc.

Another trick that helps me immensely are **BOXES**.

The bathroom sink is covered in small bottles and all sorts of products? I got small plastic crates and I put them over the toilet lid, one for my stuff, the other for my roomate's. The linen closet is just piles of things that fall when you open the door? Baby I just got a bunch of baskets and I will separate them by function.

I have baskets and small boyxes for: my cleaning products; my bird's toys and stuff; my workout accessories; my meds and daily skincare products; my tools; and pretty much all my art stuff.

It still takes some effort to keep everything in its place, but having everything in a box still looks tons better than having everything on the counter, and it's so better for the mental health.

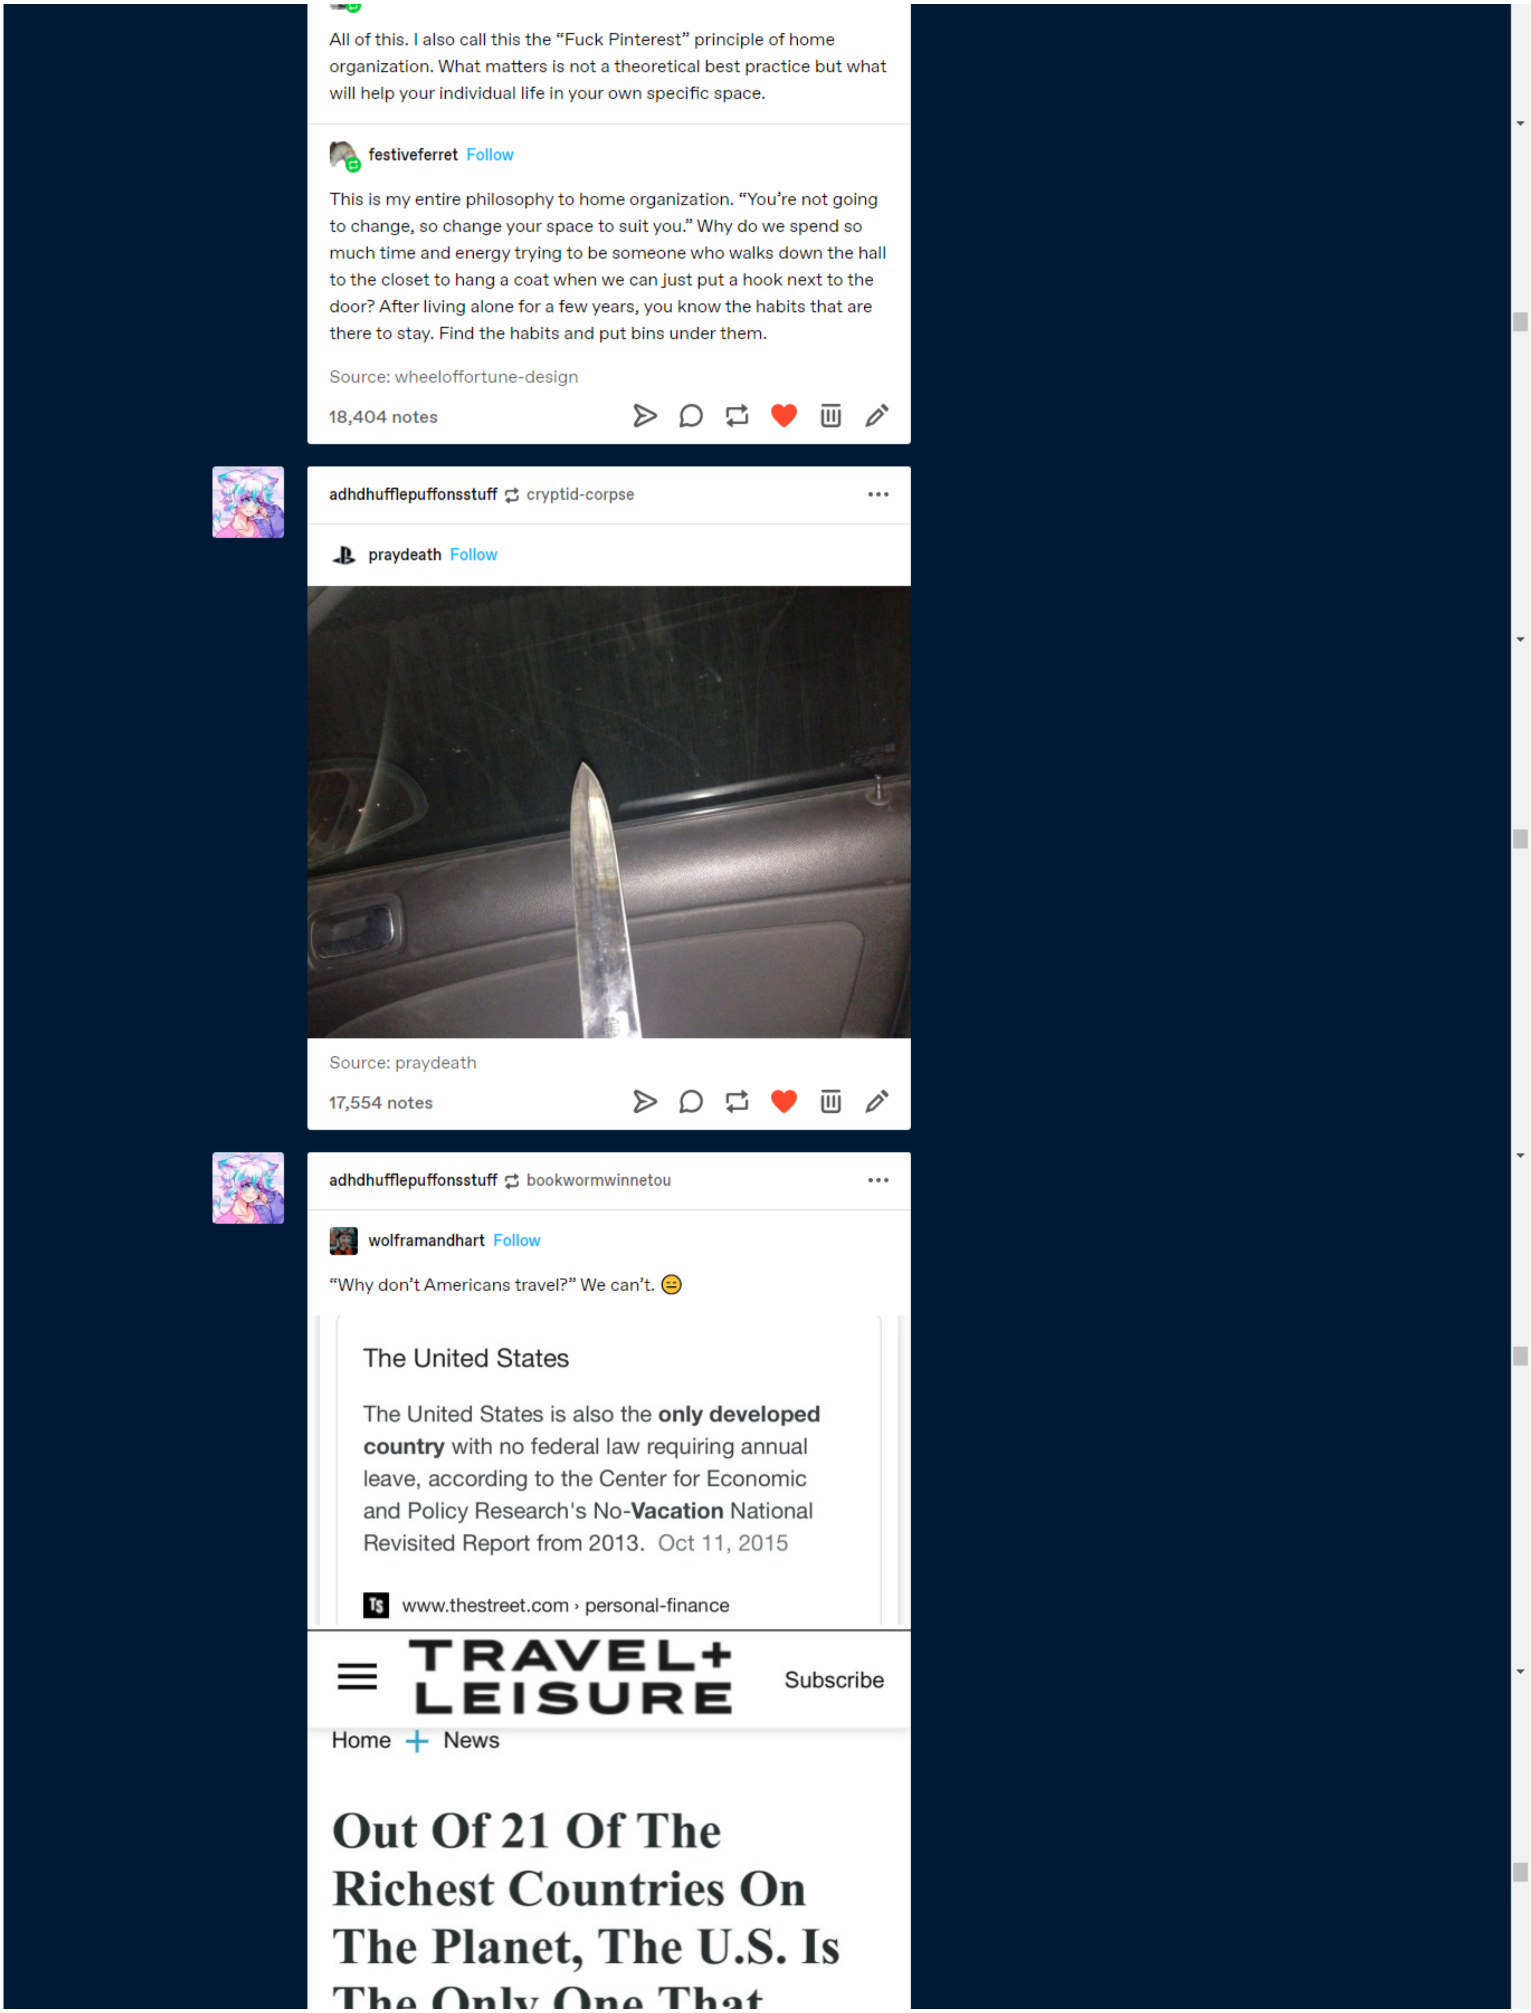
mikkeneko Follow

After YEARS of a perpetually messy room with clothes all over the floor… I cleared off two shelves of my bookshelves. Clothes go there if they aren't ready for laundry yet.

One change, and my floors are clear. And because they're clear, they're easier to keep clean.

One of the principles of design is that you have to design things according to how human beings act, not how you think they ought to act. That goes for designing your own space as well: organize for the you that you are, not the you that you think you ought to become.

lauramkaye Follow



All of this. I also call this the "Fuck Pinterest" principle of home organization. What matters is not a theoretical best practice but what will help your individual life in your own specific space.

festiveferret Follow

This is my entire philosophy to home organization. "You're not going to change, so change your space to suit you." Why do we spend so much time and energy trying to be someone who walks down the hall to the closet to hang a coat when we can just put a hook next to the door? After living alone for a few years, you know the habits that are there to stay. Find the habits and put bins under them.

Out Of 21 Of The Richest Countries On The Planet, The U.S. Is The Only One That

The Only One That Doesn't Offer Paid Vacation (Video)

wolframandhart Follow

I think on top of raising the minimum wage this needs to be a focus of ours as well. We're overworked, miserable, exhausted. Everyone is jealous when you decide not to do overtime (if you're even allowed to refuse). Everyone is jealous when you are out two weeks because you caught COVID and are trying to recover. Everyone is jealous if you get 8 weeks off to recover from surgery. "How was your vacation" people will say and I can always hear the bitterness in their voice. Americans are so broken that a ton of us straight up wish to be hurt or sick just to get a few weeks off lol. 1 in 4 Americans don't get any PTO. The rest get on avg 2 weeks total. We are suffering, my dudes.

this may be an Unpopular Opinion (even on tumblr) but like the 8-hour workday is just Too Gotdamn Long

like even sitting in an office for eight hours a day isn't particularly pleasant (or healthy, as we are beginning to see) but when we're talking about doing *actual work* for that same amount time it gets pretty fucking brutal

doing literally *anything* (even leisure activities) for eight hours straight tends to be less than enjoyable but when we're talking about things like construction, landscaping, factory work, and hell, even foodservice and retail, eight hours is a fucking ETERNITY

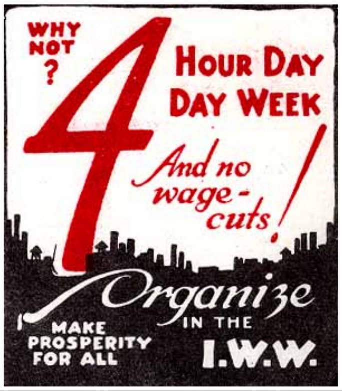
i might just be a lazy weak-willed bitch but honestly i think i'm not entirely wrong

tyrannosaurus-rex Follow

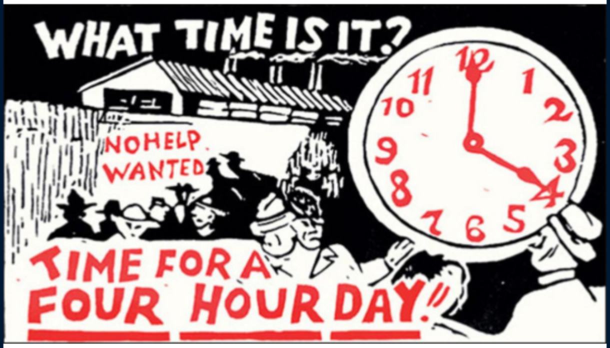
this was being worked towards by leftist labor unions way back in the day after the time of FDRs new deal. people in the 40s and 50s were already starting to realize that we no longer actually needed an 8 hour work day or even a 5 day work week.

even with the comparatively primitive factory tech of the time we were already creating a huge amount of excess production back then and companies were making massive amounts of profit. So it already stood to reason that companies should either let their employees work less and thus each employee could work a shorter shift without lowering the yearly compensation of each employee, or in cases where businesses provide an active service they would shorten the shift but hire more people to cover the necessary operating time. but of course that would mean less money for people at the top so companies fought back hard and we ended up with nixon's bullshit and so on and now its considered the norm for us to spend the vast majority of our lives doing work that really just amounts to waste.

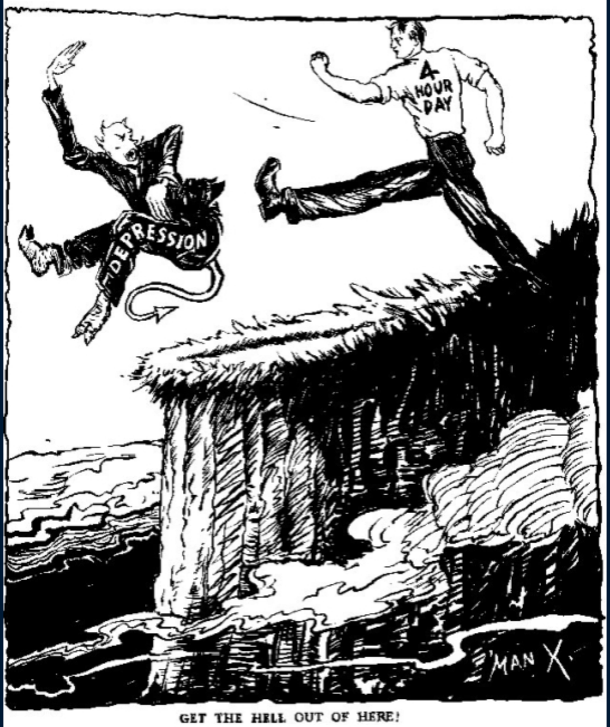
socialist-weeaboo



WHY NOT ?
4
HOUR DAY
DAY WEEK
And no wage-cuts!
Organize
IN THE
I.W.W.
MAKE PROSPERITY FOR ALL



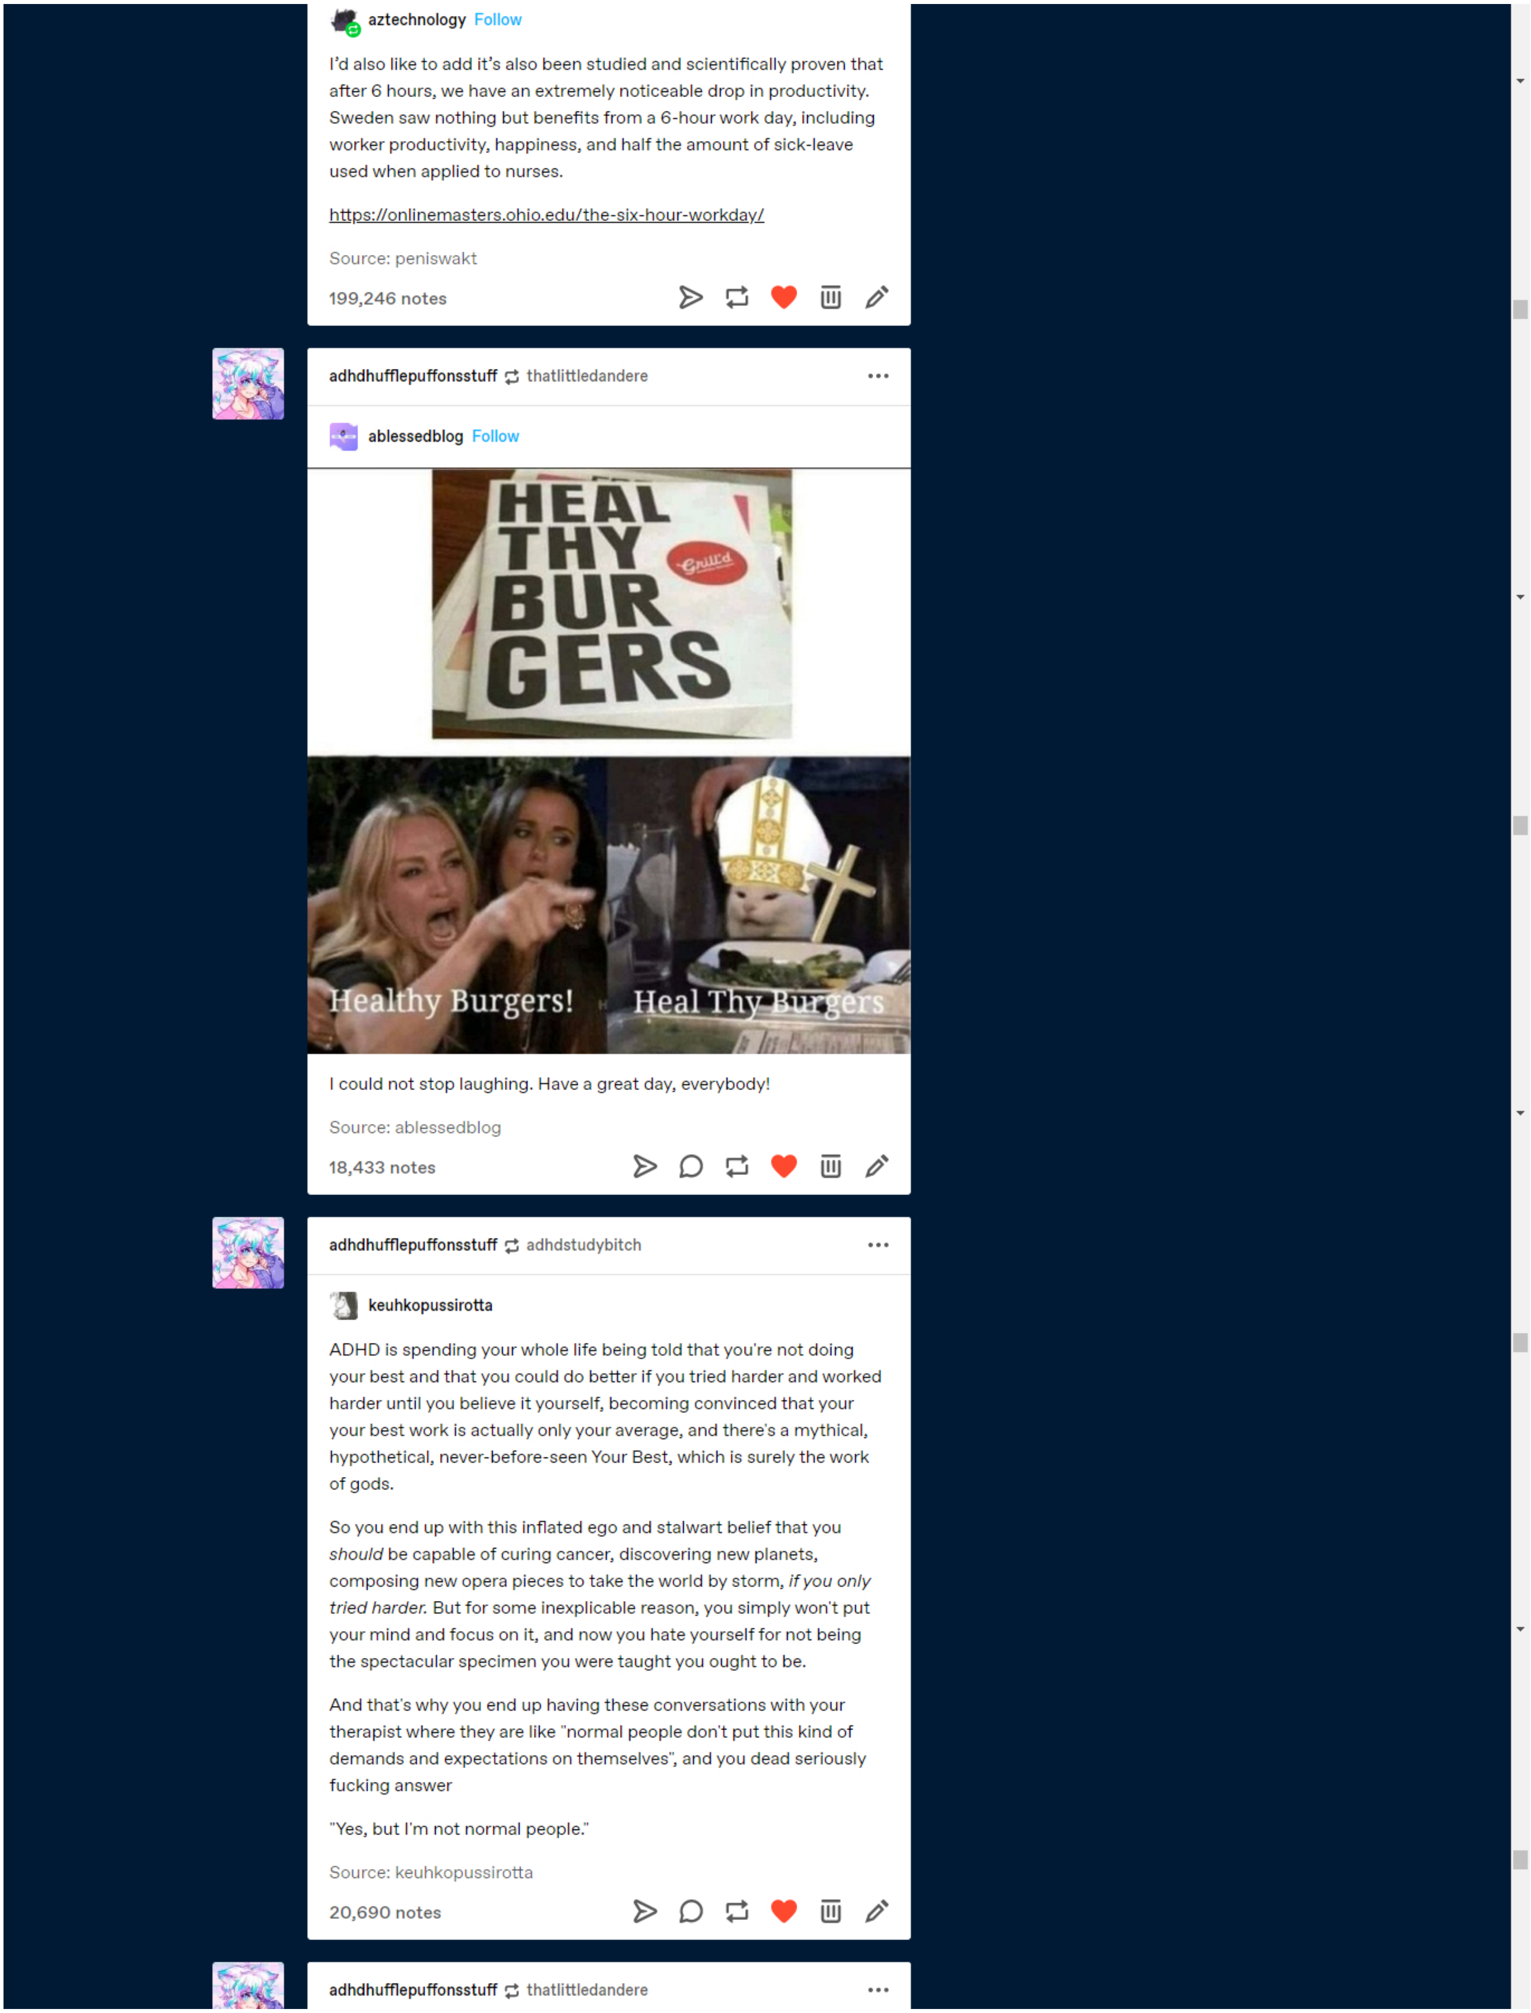
WHAT TIME IS IT?
NO HELP WANTED
TIME FOR A FOUR HOUR DAY!!



4 HOUR DAY
DEPRESSION
MAN X

GET THE HELL OUT OF HERE!

The IWW realised this and were fighting for it all the way back in the 1930s. This is a take with a lot of historical and theoretical grounding, OP, so you're standing in good stead.



aztechnology Follow

I'd also like to add it's also been studied and scientifically proven that after 6 hours, we have an extremely noticeable drop in productivity. Sweden saw nothing but benefits from a 6-hour work day, including worker productivity, happiness, and half the amount of sick-leave used when applied to nurses.

keuhkopussirotta

ADHD is spending your whole life being told that you're not doing your best and that you could do better if you tried harder and worked harder until you believe it yourself, becoming convinced that your your best work is actually only your average, and there's a mythical, hypothetical, never-before-seen Your Best, which is surely the work of gods.

So you end up with this inflated ego and stalwart belief that you *should* be capable of curing cancer, discovering new planets, composing new opera pieces to take the world by storm, *if you only tried harder.* But for some inexplicable reason, you simply won't put your mind and focus on it, and now you hate yourself for not being the spectacular specimen you were taught you ought to be.

And that's why you end up having these conversations with your therapist where they are like "normal people don't put this kind of demands and expectations on themselves", and you dead seriously fucking answer

"Yes, but I'm not normal people."

this pandemic will end and you'll claim the window seat in your favorite cafe, stand in a crowd at a concert, visit a museum and make crappy art in the park. sometimes things feel like they'll go on forever, sometimes bad things feel heavier than good things, sometimes life feels like it's slowing down and all you're doing is waiting for the full stop— but just because this hopelessness is all that you're feeling right now, doesn't mean that it's all there is. there's always more and you will experience that, and you will feel alive again.

I was talking to someone about planting food and fruit trees in public spaces and they were like "Why so everyone can steal the food?"

And I was like "See, that's the problem right there. Why should taking fruit off a public tree be stealing?"

1:59 PM · 2020-08-08 · Twitter for iPhone

angiethewitch Follow

hey a local town actually did this!

they planted berries, root vegetables, leafy greens, herbs, all sorts. they label each plant and the sign said "free to take, leave some for others to enjoy!"

and people did. they took a bit, but left some for others.

it also fed the homeless people living around there.

bearing in mind this is a tourist town, so i half expected to see the plants gone. but nope, there's always some left.

people aren't naturally selfish, and they will share. the initiative works

explorerrowan Follow

And honestly? Most people who don't need it won't bother to stop and pick fruit. It's only people who actually need it who will devote the time. People with money still have grocery stores.

religion-is-a-mental-illness

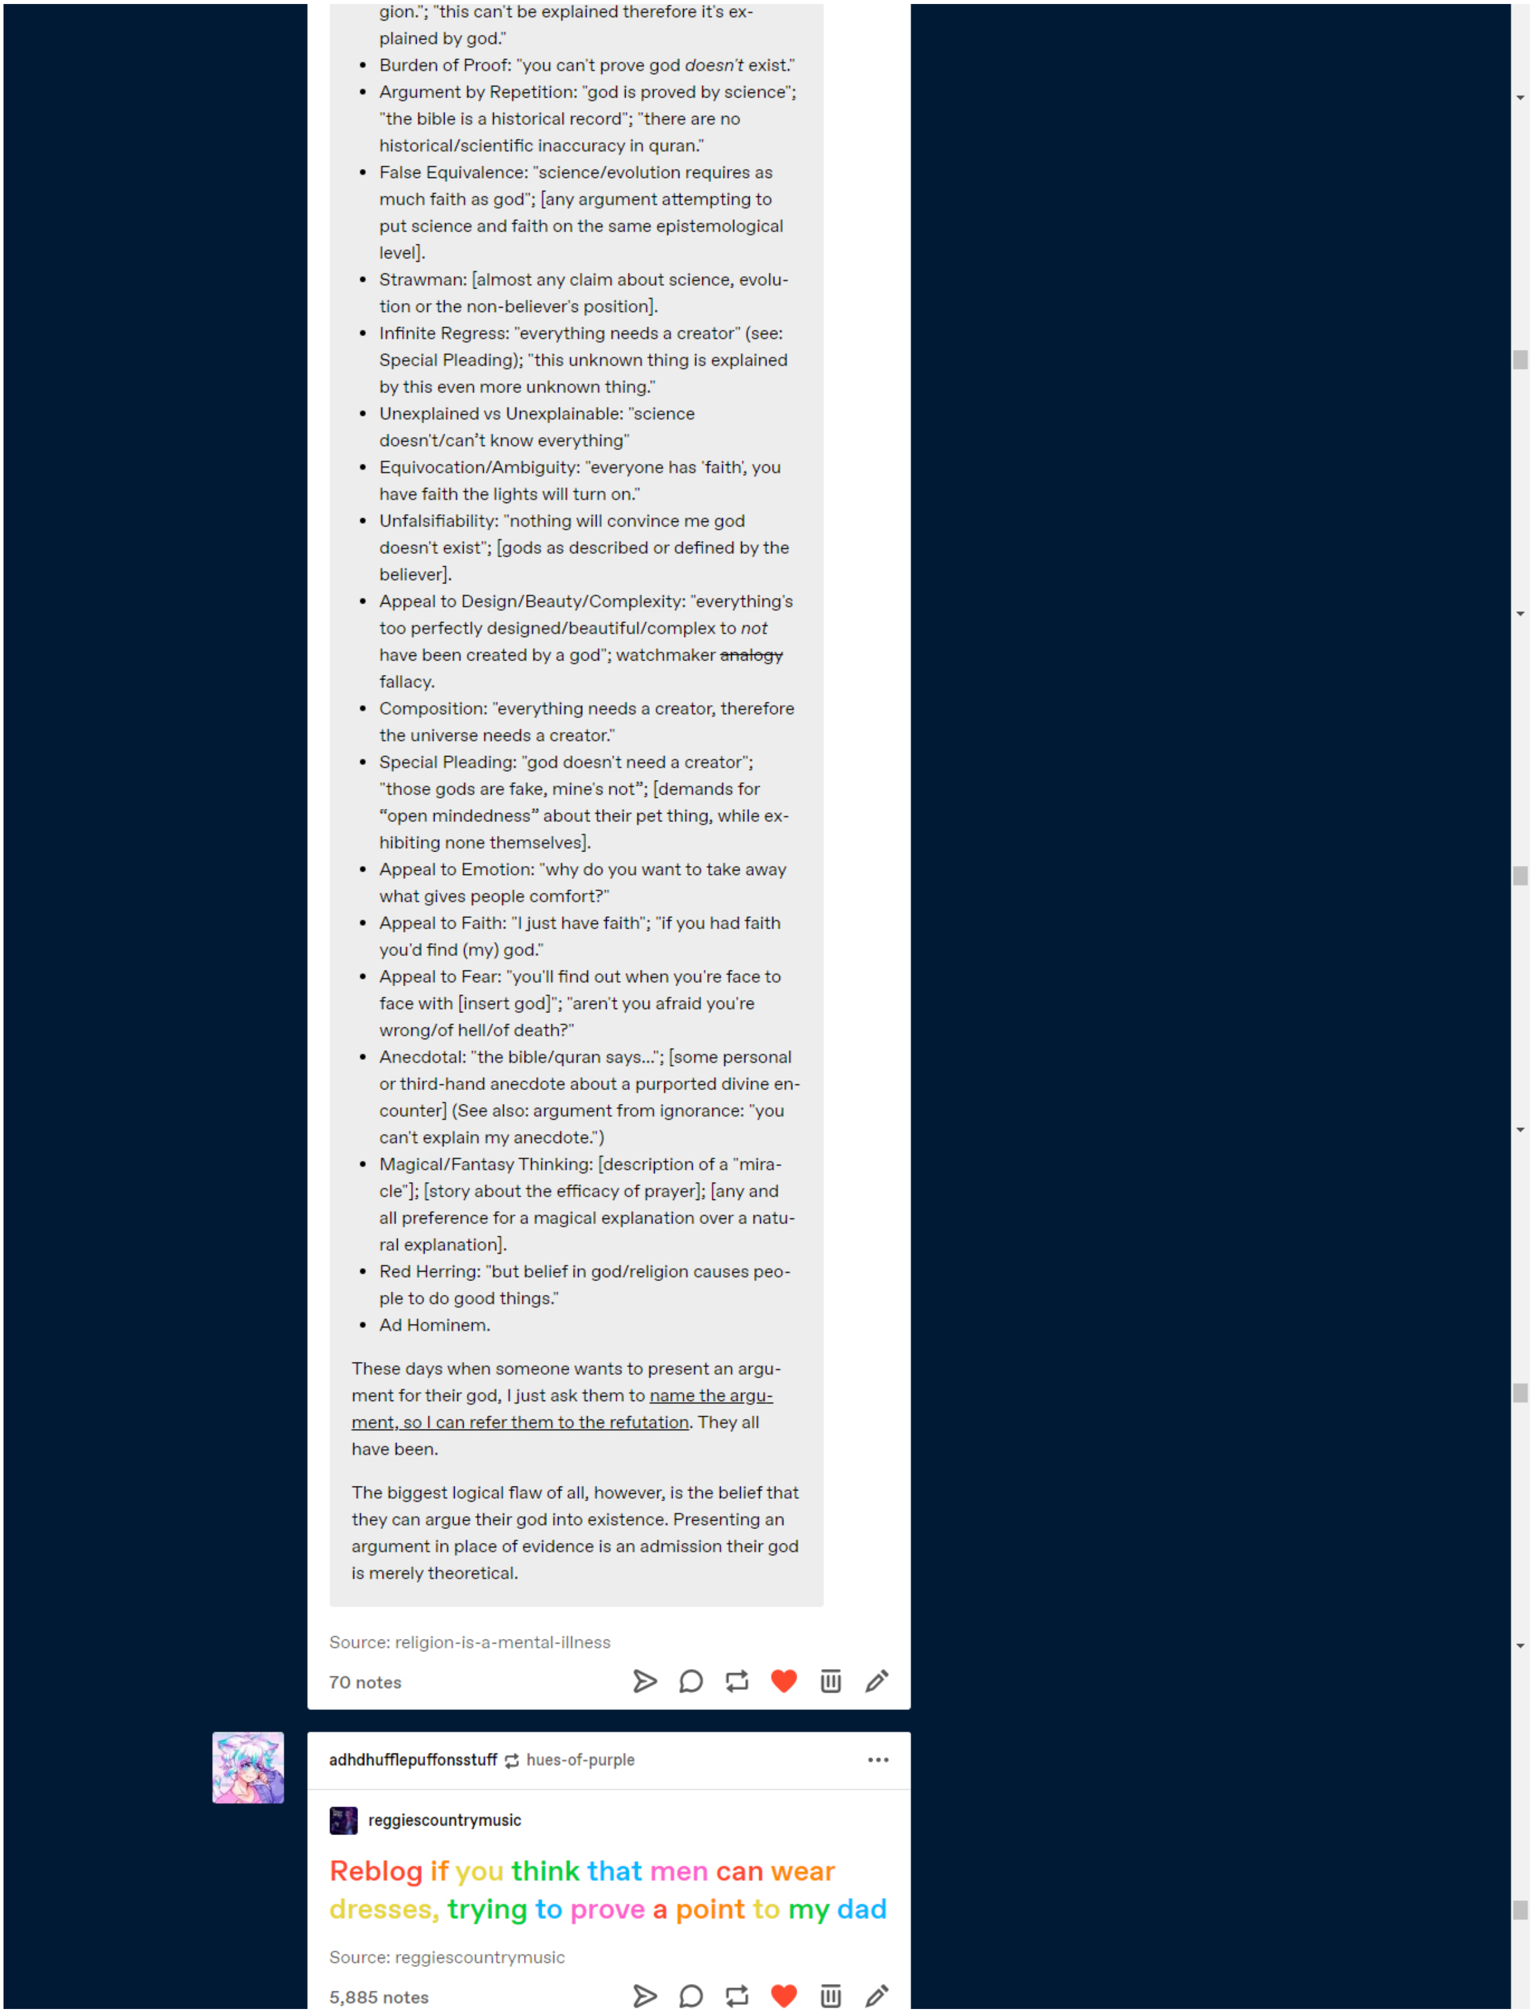
fantasticmrhooty asked:

What are the most common logical fallacies that you have seen when debating religious peoples/researching the justifications that religious peoples desperately try to make for their own religion being the 'real' and 'true' one?

religion-is-a-mental-illness answered:

Some of these might be better categorized more specifically or more generally, but I can't be bothered going down to that level of detail.

- Argument from Ignorance or Personal Incredulity: "If god didn't make everything, then what did, hmm?"; "I can't believe that everything *wasn't* made by god."; "morality requires god"; [tale about something that statistically possible or even probable]. (See also: Burden of Proof)
- Circular Reasoning: "the bible is true because the bible says the bible is true"; "the truth of the quran is in the quran, just read it"
- Begging the Question: "... and since the universe needs a creator, then that must be god"; "objective morality requires god."
- Inconsistency/Contradiction: god is both just and merciful; both good and works in mysterious ways; both all-knowing and grants free will; both perfect and needs worship; is both evident and requires faith; an eternal, changeless god with a new covenant; "atheists just hate god"; "atheism is a reli-



gion."; "this can't be explained therefore it's explained by god."

- Burden of Proof: "you can't prove god *doesn't* exist."
- Argument by Repetition: "god is proved by science"; "the bible is a historical record"; "there are no historical/scientific inaccuracy in quran."
- False Equivalence: "science/evolution requires as much faith as god"; [any argument attempting to put science and faith on the same epistemological level].
- Strawman: [almost any claim about science, evolution or the non-believer's position].
- Infinite Regress: "everything needs a creator" (see: Special Pleading); "this unknown thing is explained by this even more unknown thing."
- Unexplained vs Unexplainable: "science doesn't/can't know everything"
- Equivocation/Ambiguity: "everyone has 'faith', you have faith the lights will turn on."
- Unfalsifiability: "nothing will convince me god doesn't exist"; [gods as described or defined by the believer].
- Appeal to Design/Beauty/Complexity: "everything's too perfectly designed/beautiful/complex to *not* have been created by a god"; watchmaker ~~analogy~~ fallacy.
- Composition: "everything needs a creator, therefore the universe needs a creator."
- Special Pleading: "god doesn't need a creator"; "those gods are fake, mine's not"; [demands for "open mindedness" about their pet thing, while exhibiting none themselves].
- Appeal to Emotion: "why do you want to take away what gives people comfort?"
- Appeal to Faith: "I just have faith"; "if you had faith you'd find (my) god."
- Appeal to Fear: "you'll find out when you're face to face with [insert god]"; "aren't you afraid you're wrong/of hell/of death?"
- Anecdotal: "the bible/quran says..."; [some personal or third-hand anecdote about a purported divine encounter] (See also: argument from ignorance: "you can't explain my anecdote.")
- Magical/Fantasy Thinking: [description of a "miracle"]; [story about the efficacy of prayer]; [any and all preference for a magical explanation over a natural explanation].
- Red Herring: "but belief in god/religion causes people to do good things."
- Ad Hominem.

These days when someone wants to present an argument for their god, I just ask them to name the argument, so I can refer them to the refutation. They all have been.

The biggest logical flaw of all, however, is the belief that they can argue their god into existence. Presenting an argument in place of evidence is an admission their god is merely theoretical.

> This machine allows anyone to work for minimum wage for as long as they like. Turning the crank on the side releases one penny every 4.97 seconds, for a total of $7.25 per hour. This corresponds to minimum wage for a person in New York. This piece is brilliant on multiple levels, particularly as social commentary. Without a doubt, most people who started operating the machine for fun would quickly grow disheartened and stop when realizing just how little they’re earning by turning this mindless crank. A person would then conceivably realize that this is what nearly two million people in the United States do every day…at much harder jobs than turning a crank. This turns the piece into a simple, yet effective argument for raising the minimum wage.

Repeat after me — James and Sirius bullied Severus for no good reason.

Severus had done nothing to deserve to that ***horrific*** bullying.

> 'Yeah,' said Harry, 'but he just attacked Snape for no good reason, just because – well, just because you said you were bored,' he finished, with a slightly apologetic note in his voice.
> 'I'm not proud of it,' said Sirius quickly.

Forget about this conversation between Harry and Sirius, if you just read the SWM chapter with attention, it would be clear that they attacked him for entertainment, out of boredom. And there are clues in the text that Severus was regularly attacked by James and Sirius.

"Don't you 'look man' me," says Rufus, and the boy's eyes drop immediately, cheeks pinking. "Sorry sir," he says, and Rufus thinks, okay, we can work with that. Then he pulls a bottle of scotch and Rufus grins his shark's grin and invites the boy inside.

"Can't ask a man to do something for you without doing something for him," says Rufus, easy, as he seats himself at his kitchen table. Dean hovers, uncertain. "It's not polite." Dean's pink mouth opens, shuts. Good, thinks Rufus, at least he's learning to control that smart mouth of his. "But you have been kind enough to bring me a drink," he continues, "so let's drink. Glasses are over the sink there, why don't you grab us a couple." Rufus doesn't phrase it like a question, and Dean follows it like an order. Interesting, thinks Rufus. He leans back a little in his chair, boots planted firmly on the ground, legs apart. Just getting comfortable. Nothing like a little diversion to liven up his afternoon.

rosalarian Follow

I went on a date with a guy on vacation from Switzerland a couple years ago, and had almost this exact conversation with him when it came time to pay for the meal. He knew tipping was part of our culture and always left a few dollars because, as he said, "your minimum wage is so low compared to everywhere else" and I informed him that servers make less than *half* of minimum wage and the rest comes from tips, and he was *horrified*. Like he had just witnessed a murder. He about emptied his wallet out on the table and vowed to tip 25% anytime he was in America. As someone who has worked as a server/bartender, I know a lot of folks in our industry don't like serving foreign customers because they don't tip well/at all, but it's because we're the only country that does things in this fucked up way, and they truly don't know that in many places, people are making $2/hr. Like, yes, sometimes you can get enough tips to be making $30+/hr, but then there's all the side work you have to do that nobody tips you for, the hour before open/after close where you are prepping and cleaning, the complete lack of breaks despite it being illegal. The best industry job I ever had paid me the full minimum wage instead of the server min. That's extremely rare. I wore the soles completely off my shoes and destroyed my knees and had no social life for an industry that considers $10/hr to be a crazy high wage.

madtechnomage

I am so glad Washington state includes the restaurant industry in our minimum wage. Every state is different and it's typically states that are at or near the federal minimum that have below minimum exemption for tipped workers.

cali-cocaine

Don't commit long term to someone until you've seen them stuck in traffic. Until you've witnessed them dealing with slow internet connection, building an IKEA furniture set, or disappointed from their favorite team's loss. Don't marry until you've seen them completely drunk, waiting for food in a restaurant for entirely too long, or watched them search for their phone or car keys in a panic. Before you say yes to forever, see them angry. See them sick, scared, and focused. Notice when and what they want, when they lose, their patience is tested, and when they are stressed. You can't really change someone, but you can reveal them. Sometimes people didn't actually change later down the line. Perhaps you just never really knew who they truly were. ✨

this is good

embyrr922 Follow

I'd just like to add, see how they behave when they're angry/frustrated/exhausted, and if you see something that concerns you, wait until they're calm, and then talk to them about it.

My husband used to yell when he got frustrated, but after I explained to him that I found it upsetting, he stopped yelling and started consciously working on asking for help before he got to that level of frustration.

When I'm upset over something, or just in a bad mood, I tend to withdraw. My husband explained to me that it makes him feel like I'm mad at him, so now when I need some space, I'll tell him what I'm upset about, or that I'm in a bad mood for no particular reason, and I need to be alone for a little while.

See your friends and partners at their worst, but don't assume that their worst is immutable. If someone loves and cares about you, they'll try to accommodate you to the best of their ability.

ladylike-foxes Follow

^^^^
This is the best advice I've ever seen on this site, and it is so important. Communication is everything, and is 80% of the reason my husband and I have such a healthy, strong, and supportive relationship.

what-even-is-thiss

The English: This is our legendary King Arthur. His bravest knight is named Gawain who cut off a green giants head

The French: That's cool, but what if his coolest knight was FRENCH and practiced INFIDELITY with the QUEEN

The English: That's not…

The French: His name is Lancelot.

The English: Okay actually that name frickin rules. Proceed.

what-even-is-thiss

The English: Uh France what are you doing to our oc?

The French: Making the downfall of his kingdom come at the hands of Lancelot.

The English: The… French one?

The French: Yeah.

The English: Aight then.

what-even-is-thiss

Historians: Hey! Are you two making things up again?

The French and English: *quickly throw their Lancelot/Guinevere fanfics into a bush* No! Real historical figures! What are you talking about???

jaykmoon33

The idea of King Arthur being the equivalent to our modern day shows/anime is both a little insulting but also hilarious.

what-even-is-thiss

It is though. It's the medieval equivalent of the MCU or Naruto.

anomalous-heretic Follow

The stories of the Knight of the Round Table or Charlemagne's Paladins were 100% just the medieval Justice League or Avengers.

donateliamitsuki Follow

I was today's years old when I learned Lancelot and King Arthur ain't real????

what-even-is-thiss

lol no Arthur might have existed but if he did he was a native Briton warlord fighting the Anglo-Saxons that got so mythologized that within everything written about him whatever was originally true in the oral legends about him was lost and overly mythologized by the time a version of his story was first written down in the 500s. The time Arthur supposedly existed was probably around the 200s to 400s because some of his legends involve him or members of his court fighting the remains of the western Roman empire. Lancelot is just an invention by a French poet lol. Chretien de Troyes specifically. Also he was supposedly a lost French nobleman raised by a fairy that lives in a lake so yeah if you dig into the original written legends for lives in a lake so yeah if you dig into the original written legends for more than like ten lines using modern logic you can figure out that they're not based on real people. Most people don't read the original source material though so I don't blame you for not knowing. I think the original poems and compilations are fascinating but I also have a special interest in old literature and studied it in college and know that most people like to read stuff written after 1890 when literature actually Became Good.

jenniferrpovey Follow

Arthuriana has always been reenvisioned. It's *all* fanfic. Write your own!

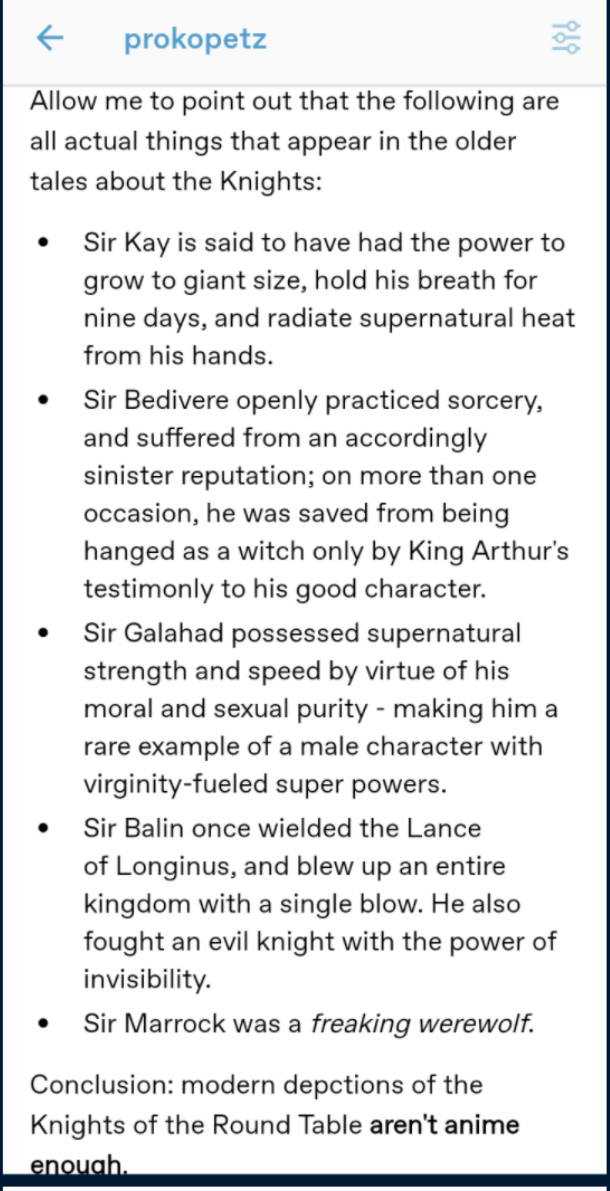
aqueerkettleofish Follow

The most historically accurate version of the Arthurian Legends was done by Monty Python.

Not a punchline.

definite-human Follow

@prokopetz on this issue:



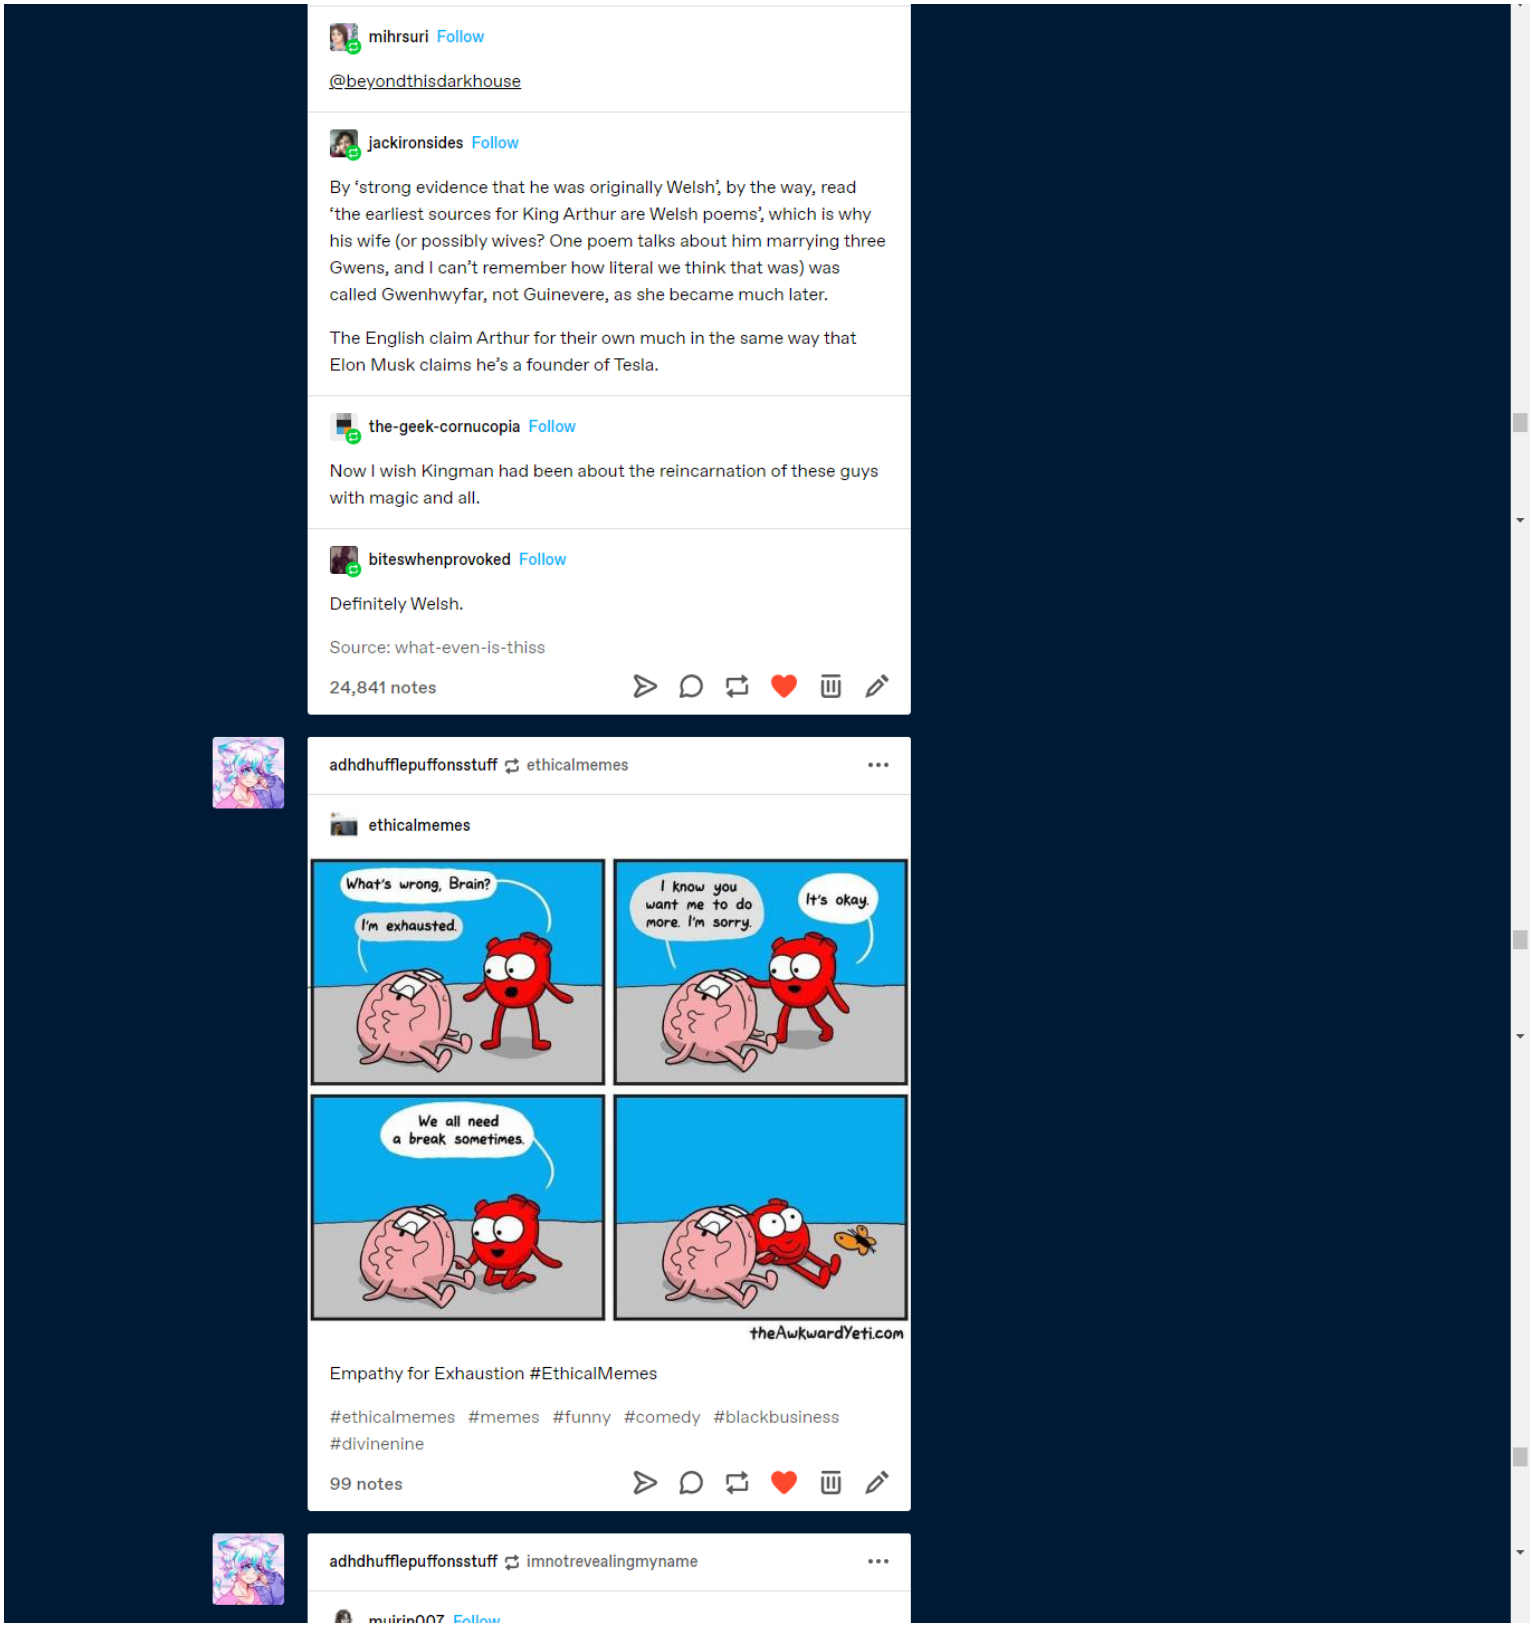
Allow me to point out that the following are all actual things that appear in the older tales about the Knights:

- Sir Kay is said to have had the power to grow to giant size, hold his breath for nine days, and radiate supernatural heat from his hands.
- Sir Bedivere openly practiced sorcery, and suffered from an accordingly sinister reputation; on more than one occasion, he was saved from being hanged as a witch only by King Arthur's testimony to his good character.
- Sir Galahad possessed supernatural strength and speed by virtue of his moral and sexual purity - making him a rare example of a male character with virginity-fueled super powers.
- Sir Balin once wielded the Lance of Longinus, and blew up an entire kingdom with a single blow. He also fought an evil knight with the power of invisibility.
- Sir Marrock was a *freaking werewolf*.

Conclusion: modern depctions of the Knights of the Round Table **aren't anime enough.**

cloverandcrossbones Follow

Also there's strong evidence that Arthur was originally Welsh. Arthurian legends are like a multi-country collab project over the course of centuries



mihrsuri Follow

@beyondthisdarkhouse

jackironsides Follow

By ‘strong evidence that he was originally Welsh’, by the way, read ‘the earliest sources for King Arthur are Welsh poems’, which is why his wife (or possibly wives? One poem talks about him marrying three Gwens, and I can’t remember how literal we think that was) was called Gwenhwyfar, not Guinevere, as she became much later.

The English claim Arthur for their own much in the same way that Elon Musk claims he’s a founder of Tesla.

the-geek-cornucopia Follow

Now I wish Kingman had been about the reincarnation of these guys with magic and all.

biteswhenprovoked Follow

Definitely Welsh.
